Pierre de Bérulle, 1665* **Scientific Agriculture**, 1924 *Oeuvres Complètes de H. de Balzac* Honoré de Balzac, 1877 **Life** M. Kronegger, Anna-Teresa Tymieniecka, 2012-12-06 In her Introduction Tymieniecka states the core theme of the present book sharply. Is culture an excess of nature's prodigious expansiveness an excess which might turn out to be dangerous for nature itself if it goes too far or is culture a natural congenial prolongation of nature life. If the latter then culture is assimilated into nature and thus would lose its claim to autonomy its criteria would be superseded by those of nature alone. Of course nature and culture may both still be seen as being absorbed by the inner powers of specifically human inwardness on which view human being caught in its own transcendence becomes separated radically in kind from the rest of existence and may not touch even the shadow of reality except through its own prism. Excess therefore or prolongation. And on what terms. The relationship between culture and nature in its technical phase demands a new elucidation. Here this is pursued by excavating the root significance of the multiple rationalities of life. In contrast to Husserl who differentiated living types according to their degree of participation in the world the phenomenology of life disentangles living types from within the onto-poietic web of life itself. The human creative act reveals itself as the Great Divide of the Logos of Life a divide that does not separate but harmonizes thus dispelling both naturalistic and spiritualistic reductionism.

Story,1892 **Axiological Pluralism** Lucia Busatta,Carlo Casonato,2021-09-02 This book analyses the features and functionality of the relationship between the law individual or collective values and medical scientific evidence when they have to be interpreted by judges courts and para-judisdictional bodies The various degrees to which scientific data and moral values have been integrated into the legal discourse reveal the need for a systematic review of the options and solutions that

judges have elaborated on In turn the book presents a systematic approach based on a proposed pattern for classifying these various degrees together with an in depth analysis of the multi layered role of jurisdictions and the means available to them for properly handling new legal demands arising in plural societies The book outlines a model that makes it possible to focus on and address these issues in a sustainable manner that is to respond to individual requests and technological advances in the field of biolaw by consistently and effectively applying suitable legal instruments and jurisdictional interpretation
