Farenga, Salvatore G. Garofalo, Daniel Ness, 2025-10-24 This comprehensive handbook delves into curriculum praxis, human development and cognition within the contexts of the STEAM disciplines: science, technology, engineering, arts, architecture and mathematics. Cutting edge research will help educators identify best practice techniques for developing students' knowledge in STEAM subjects as well as capture contemporary social and political issues within the STEAM context. Drawing on the work of over 50 international contributors, this volume covers both emergent and established areas of research, giving voice to newcomers to the field as well as perspectives from established experts. These areas are divided into five sections: foundations, content teaching and learning throughout the lifespan, equity and enrichment, and settings. Each topic is considered in both its historical and current context with a focus on the interconnections between theory and practice. This

book offers a first of its kind overview of STEAM curriculum development which will be especially useful to educational practitioners and researchers of STEAM subjects as well as teacher educators overseeing STEAM education This resource will also be useful for K 12 school and institutional libraries as reference material and for curriculum specialists and administrators seeking to identify methods of best educational practices within STEAM
