**Conflicted** Isaac Blacksin, 2024-07-02 How is popular knowledge of war shaped by the stories we consume what are the boundaries of this knowledge and how are these boundaries policed or contested by journalists producing knowledge from war zones Based on years of fieldwork in Iraq Syria Lebanon Afghanistan and Ukraine *Conflicted* challenges normative conceptions of war by revealing how representational authority comes to be Turning the lens on journalists from The New York Times The Washington Post The Wall Street Journal and other prominent publications Isaac Blacksin shows why news coverage of contemporary conflict widely presumed to function as a critique of excessive violence instead serves to sanction official rationales for war Blacksin argues that journalism's humanitarian frame now hegemonic in conflict coverage serves to depoliticize and remoralize war transforming war from an effect of policy on populations to a matter of violence against the innocent Exploring the tension between experience and expression in conditions of violence and tracking how journalists respond to dominant expectations of reality *Conflicted* tells the story of war reporters and the consequences of their convergence As new wars and new reportage continue to shape our understanding of armed conflict this book makes visible both the power and the particularity of war reportage

Who Was Responsible for the Troubles? Liam Kennedy, 2020-09-23 The Troubles claimed the lives of almost four thousand people in Northern Ireland most of them civilians forty five thousand were injured in bombings and shootings Relative to population size this was the most intense conflict experienced in Western Europe since the end of the Second World War The central question posed in this book is fundamental yet it is one that has rarely been asked Who was primarily responsible for the prosecution of the Troubles and their attendant toll of the dead the injured and the emotionally traumatized Liam Kennedy who lived in Belfast throughout most of the conflict was long afraid to raise the question and its implications After years of reflection and research on the matter he has brought together elements of history politics sociology and social psychology to identify the collective actors who drove the conflict onwards for more than three decades from the days of the civil rights movement in the late 1960s to the signing of the Good Friday Agreement in 1998 The Troubles in Northern Ireland are a world class problem in miniature The combustible mix of national ethnic and sectarian passions that went into the making of the conflict has its parallels today in other parts of the world Who Was Responsible for the Troubles is an original and controversial work that captures the terror and the pain but also the hope of life and the pursuit of happiness in a deeply divided society

**The Resilience of Cultural Landscapes** Fabrizio Aimar, 2024-04-23 This book explores the possibility of building the resilience of the UNESCO cultural landscapes both using theoretical conceptions and practical strategies and actions. Two case studies have been selected one in Italy and one in China which have then been explored for the first time in such a comparative way. Different notions of landscape as well as the driving force of changes affecting these landscapes are examined and compared. Moreover the perceptions of the local communities regarding these landscapes are examined using online questionnaires with over 400 participants. This research highlights the need for an integrated management system building stronger rural communities able to manage change and continuity. Five pillars to build the resilience of these landscapes have been provided with schemes and figures requiring a people centered approach in their management. This book demonstrates strong connections between identity and landscape resilience especially in inland areas where the sense of identity is most prominent. Furthermore it is structured to make it possible to replicate this investigation in ordinary case studies i.e. ordinary landscapes. Scholars and professionals interested in cultural landscapes and heritage conservation are target of this book as well as site managers.

*The First Atomic Bomb* Jim Mangi, 2022-06-20 While German and Japanese scientists also labored unsuccessfully to create an atomic bomb by the summer of 1945 the American led team was ready to test its first weapon. As the clock ticked down to the detonation time of 05 30 hours on 16 July 1945 the nervous team of technicians and scientists waited ten miles away from Ground Zero deep in the New Mexico desert. No one knew how powerful the explosion would be or whether even at such a distance they would be safe from the

blast Even so some chose to observe the detonation from a point four miles nearer at the control bunker but then no one was even sure that the bomb would work What if that is actually what happened Under schedule pressure from the White House the scientists assembled the device in part with tape and tissue paper knowing some components were flawed These are verifiable facts It means that as many of those who gathered in the New Mexico desert feared at the time the bomb might not have worked during that first test In The First Atomic Bomb Jim Mangi explores what might happened in the event that the world's first atomic bomb had not been ready for use when it was How would this have affected the end of the war in the Pacific and indeed the Second World War as a whole Would Emperor Hirohito's armed forces have battled on When might Colonel Paul W Tibbets at the controls of his Boeing B 29 Superfortress Enola Gay have then made his historic flight over Hiroshima and would that city even have remained the target How would Stalin and the Soviets have reacted to such developments and how would this have played out in the post war world

**Politics and International Relations in Eurasia** Stylianos A. Sotiriou, 2019-03-28 Eurasia has long been characterized by intense competition among populations and among States The collapse of the Soviet Union constituted a critical juncture in the region's course since informal and formal norms subsided giving rise to a hardly regulated socio political environment where survival and security considerations ranked atop In this context populations first and foremost sought to have their existence guaranteed within nation states While in most cases that transition was accomplished without major impediments in the cases of Moldova Ukraine Georgia and Azerbaijan major challenges have been encountered leaving their mark deep in the post soviet course of the newly independent republics Moldova has been rattled by the conflict in Transdniestria Ukraine by the conflict in Crimea Georgia by the conflict in South Ossetia and Abkhazia and Azerbaijan by the conflict in Nagorno Karabakh In fact these conflicts have been classified as frozen conflicts given their unsettled nature and the smoldering fire between opposing populations within the respective republics This intense competition however has not been constrained only to the domestic level and only to the issue of frozen conflicts Eurasia's energy prospects have also been the cause of a constant power struggle among the States of the region With the Caspian Sea to constitute a rich in natural resources hub a clash of interests has taken place among the littoral States Moreover this competition has acquired a much broader geopolitical dimension extending to Eurasia's two ends the European Union and China As a result Eurasia's underbelly has become an area where the maximization of power figures as the best guarantee of survival and security in a fully unregulated environment Taken together frozen conflicts domestic level and energy politics international level stand out as the two main features of Eurasia both unfolding in comparable conditions Therefore the book presents them as a two level game aiming at offering better substantiated explanations that draw on the very fundamentals of political science and at building a bridge of communication between the two levels that allows for well informed and widely applicable policy implications
