Willis,2015-10-06 This book explores the Victorian concept of vision across scientific and cultural forms Willis charts the characterization of vision through four organizing principles small large past and future to arrive at a Victorian conception of what vision was Willis then explores how this Victorian vision influenced twentieth century ways of seeing **Victorian Literature and the Physics of the Imponderable** Sarah C Alexander,2015-07-28 The Victorians were obsessed with the empirical but were frequently frustrated by the sizeable gaps in their understanding of the world around them This study examines how literature and popular culture adopted the emerging language of physics to explain the unknown or imponderable *Uncommon Contexts: Encounters between Science and Literature, 1800-1914* Ben Marsden,Hazel Hutchinson,Ralph O'Connor,2016-09-12 Britain in the long nineteenth century developed an increasing interest in science of all kinds Whilst poets and novelists took inspiration from technical and scientific innovations those directly engaged in these new disciplines relied on literary techniques to communicate their discoveries to a wider audience The essays in this collection uncover this symbiotic relationship between literature and science at the same time bridging the disciplinary gulf between the history of science and literary studies Specific case studies include the engineering language used by Isambard Kingdom Brunel the role of physiology in the development of the sensation novel and how mass communication made people lonely *Science and Societies in Frankfurt am Main* Ayako Sakurai,2016-09-12 The nineteenth century saw science move from being the preserve of a small learned elite to a dominant force which influenced society as a whole Sakurai presents a study of how scientific societies affected the social and political life of a city As it did not have a university or a centralized government Frankfurt am Main is an ideal case study of how scientific associations funded by private patronage for the good of the local populace became an important centre for natural history *Popular Exhibitions, Science and Showmanship, 1840-1910* Joe Kember,John Plunkett,Jill A. Sullivan,2016-09-12 Victorian culture was characterized by a proliferation of shows and exhibitions These were encouraged by the development of new sciences and technologies together with changes in transportation education and leisure patterns The essays in this collection look at exhibitions and their influence in terms of location technology and ideology *Geographies of Nineteenth-Century Science* David N. Livingstone,Charles W. J. Withers,2011-12-01 In *Geographies of Nineteenth Century Science* David N Livingstone and Charles W J Withers gather essays that deftly navigate the spaces of science in this significant period and reveal how each is embedded in wider systems of meaning authority and identity Chapters from a distinguished range of contributors explore the places of creation the paths of knowledge transmission and reception and the import of exchange networks at various scales Studies range from the inspection of the places of London science which show how different scientific sites operated different moral and epistemic economies to the scrutiny of the ways in which the museum space of the Smithsonian Institution and the expansive space of the American West produced science and framed geographical understanding This volume makes clear that the science of this era varied in its constitution and reputation in relation to place and personnel in its nature by virtue of its

different epistemic practices in its audiences and in the ways in which it was put to work *The Medical Trade Catalogue in Britain, 1870-1914* Claire L. Jones, 2016-08-05 By the late nineteenth century advances in medical knowledge technology and pharmaceuticals led to the development of a thriving commercial industry The medical trade catalogue became one of the most important means of promoting the latest tools and techniques to practitioners Drawing on over 400 catalogues produced between 1870 and 1914 Jones presents a study of the changing nature of medical professionalism She examines the use of the catalogue in connecting the previously separate worlds of medicine and commerce and discusses its importance to the study of print history more widely Natural History Societies and Civic Culture in Victorian Scotland Diarmid A. Finnegan, 2016-09-12 The relationship between science and civil society is essential to our understanding of cultural change during the Victorian era Science was frequently packaged as an appropriate form of civic culture inculcating virtues necessary for civic progress In turn civic culture was presented as an appropriate context for enabling and supporting scientific progress Finnegan s study looks at the shifting nature of this process during the nineteenth century using Scotland as the focus for his argument Considerations of class religion and gender are explored illuminating changing social identities as public interest in science was allowed even encouraged beyond the environs of universities and elite metropolitan societies **Communities of Science in Nineteenth-Century Ireland** Juliana Adelman, 2016-09-12 The nineteenth century was an important period for both the proliferation of popular science and for the demarcation of a group of professionals that we now term scientists Of course for Ireland largely in contrast to the rest of Britain the prominence of Catholicism posed various philosophical questions regarding research Adelman s study examines the practical educational impact of the growth of science in these communities and the impact of this on the country s economy the role of museums and exhibitions in spreading scientific knowledge and the role that science had to play in Ireland s turbulent political context Adelman challenges historians to reassess the relationship between science and society showing that the unique situation in Victorian Ireland can nonetheless have important implications for wider European interpretations of the development of this relationship during a period of significant change **Science Periodicals in Nineteenth-Century Britain** Gowan Dawson, Bernard Lightman, Sally Shuttleworth, Jonathan R. Topham, 2020-03-02 Periodicals played a vital role in the developments in science and medicine that transformed nineteenth century Britain Proliferating from a mere handful to many hundreds of titles they catered to audiences ranging from gentlemanly members of metropolitan societies to working class participants in local natural history clubs In addition to disseminating authorized scientific discovery they fostered a sense of collective identity among their geographically dispersed and often socially disparate readers by facilitating the reciprocal interchange of ideas and information As such they offer privileged access into the workings of scientific communities in the period The essays in this volume set the historical exploration of the scientific and medical periodicals of the era on a new footing examining their precise function and role in the making of nineteenth century science and

enhancing our vision of the shifting communities and practices of science in the period This radical rethinking of the scientific journal offers a new approach to the reconfiguration of the sciences in nineteenth century Britain and sheds instructive light on contemporary debates about the purpose practices and price of scientific journals

The Making of British Anthropology, 1813-1871 Efram Sera-Shriar, 2016-08-03 Victorian anthropology has been derided as an armchair practice distinct from the scientific discipline of the twentieth century But the observational practices that characterized the study of human diversity developed from the established sciences of natural history geography and medicine Sera Shriar argues that anthropology at this time went through a process of innovation which built on scientifically grounded observational study Far from being an evolutionary dead end nineteenth century anthropology laid the foundations for the field based science of anthropology today

The British Arboretum Paul A. Elliott, Charles Watkins, Stephen Daniels, 2016-09-12 This study explores the science and culture of nineteenth century British arboretums or tree collections The development of arboretums was fostered by a variety of factors each of which is explored in detail global trade and exploration the popularity of collecting the significance to the British economy and society developments in Enlightenment science changes in landscape gardening aesthetics and agricultural and horticultural improvement Arboretums were idealized as microcosms of nature miniature encapsulations of the globe and as living museums This book critically examines different kinds of arboretum in order to understand the changing practical scientific aesthetic and pedagogical principles that underpinned their design display and the way in which they were viewed It is the first study of its kind and fills a gap in the literature on Victorian science and culture
