Peopling Marketing, Organization, and Technology Dirk vom Lehn, 2024-01-31. Peopling Marketing: Organization and Technology takes an interactionist attitude to study the organization of marketing interaction and the embedding of technology within that organization. By analysing clear illustrative studies, this book explicates the interactionist attitude and demonstrates that production, placing, promotion and pricing are achieved in and through marketing interaction. The studies investigate marketing interaction on street markets, decision making about the digitalization of supermarkets, the design of exhibitions and social media to generate memorable experiences, the interactive experiencing of exhibits and the development of guiding visions in the promotion of Virtual Reality. The analyses reveal the practical and social organization of actions through which marketing and consumption are accomplished. By using different interactionist research methods, they show the contribution research using the interactionist attitude can make to marketing and consumer research as well as to interactionist sociology concerned with marketing interaction. Aimed at academics, researchers and students in the fields of marketing and consumer research as well as in social psychology and sociology, this book will encourage scholars and students in marketing and consumer research to shift their focus from the symbolic to marketing interaction.
