Sylvie Naar-King, 2016-07-06 Almost one out of every three US children is overweight or obese with minority youth at highest risk There are limited efficacious pediatric obesity interventions available for clinicians and successful weight loss trials for minority youth are rare Even fewer interventions have been shown to significantly improve clinical health outcomes such as adiposity blood pressure and cholesterol level and maintenance of behavior change over the long term remains a challenge Translation I research in which bench findings are applied to the bedside is uncommon in the behavioral arena Thus advances in our understanding of fundamental human processes such as motivation emotion cognition self regulation decision making stress and social networks are not being optimally applied to our most pressing behavioral health problems This issue of Pediatric Clinics will focus on promising behavioral treatments in the pipeline that have been translated from basic behavioral science and are the process of refinement and proof of concept testing **Access** Dr. Amy Lee, Douglas Ramsthal CFP®, Jessica Carpenter RDN MBA, 2022-01-07 Access Addressing the Obesity Crisis By Dr Amy Lee Douglas Ramsthal CFP and Jessica Carpenter RDN MBA As a trained physician seeing the many types of patients in Dr Amy Lee's years of practice she has come to realize that what she does in treating a patient with obesity is a not straightforward There is not one type of diet regimen for everyone just as if there is not one pill that fixes all problems She finds herself working backwards by first meeting someone with the condition of overweightness followed by digging into their history on the root cause of the outcome What needs to be recognized is the many causes which could be genetic predisposition environmental forces complications from mental health or simply taking a medication with adverse reactions of weight gain In order for practitioners like Dr Lee to carry out this job they need the medical community as well as the ancillary services to recognize the complexity of what it takes to fully make an impact in this patient population If they do not make changes and move forward this epidemic of obesity will surely become the next pandemic Dr Lee's hope in publishing Access Addressing the Obesity Crisis is to share with her colleagues the other side of the practice often overlooked or under recognized This is an attempt to shed a little light to what they are doing as medical bariatricians and the impact they can make for their patients

WE Matter! Wendi S. Williams, 2021-11-29 Increasingly social cultural and political discourse is deeming Black women and girls to be a critical group to engage We are told their lives should matter and yet there is also overwhelming evidence that Black women and girls continue to be what Malcolm X declared The most neglected person in America This critical volume engages a conversation at the intersection of the fields of education and psychology among recognized Black women

scholars that contemporizes the discourse about Black women's and girls' diversity, their sociocultural contexts and various approaches to communal and clinical work with them to support their mental health, wellness and thriving. **WE Matter: Intersectional Anti-Racist Feminist Interventions with Black Girls and Women** is a significant new contribution to Black Studies, Mental Health and Gender Studies and will be a great resource for academics, researchers and advanced students of Sociology, Psychology, Education and Politics. The chapters in this book were originally published as a special issue of *Women Therapy*.

Childhood and Adolescent Obesity Lauren A. Stutts, 2016-10-31 This book covers the development and treatment of childhood and adolescent obesity. It is written from a biopsychosocial perspective and explores obesity from a holistic perspective and addresses the extent of the obesity epidemic and how obesity is defined and assessed in children. It also chronicles the varying causes and contributors to childhood obesity as well as the physical, psychological and social consequences of it. The author highlights how a psychologist assesses childhood obesity and the potential psychological disorders related to obesity and also includes descriptions of specific interventions for childhood obesity. The intervention section integrates a community-based perspective that is often lacking in the literature and specifically addresses underserved populations. Finally, this book concludes with practical case studies, discussion questions and case recommendations.

Writing Blackgirls' and Women's Health Science Jameta Nicole Barlow, 2023-12-21 This field of Black girls and women's health (BGWH) science is both transdisciplinary and interdisciplinary. As such, the contributors to this edited collection offer a unique lens to BGWH science, expanding our collective scientific worldviews. The contributing authors draw upon their ontological and epistemological knowledge to formulate pathways and inform methodologies for doing research and praxis to address BGWH. Each contributor draws upon these knowledges and offers the reader a way to better understand how their framing and writing can create change in the health of Black girls and women.

Community Health Workers in Action Melvin Delgado, 2020 Health is a universal topic, although complex to understand because to adequately cover it requires the introduction of an historical context and socio-cultural factors. Health and health inequities touch the lives of millions of people of color across all regions and a desperate search for innovative ways of reaching them in an affirming and cost-effective manner. This search translates into cultural and linguistic programs that empower and foster social change, bringing immense rewards and challenges. Community health workers offer tremendous promise in getting much-needed health care to those in most need, allowing for innovative practice in reaching those in greatest need. Health care health workers, urban communities.
