*Recombinant Proteins from Plants* Charles Cunningham, Andrew J. R. Porter, 2008-02-05 Recombinant Proteins from Plants is one of the most exciting and fastest developing areas in biology The latest molecular techniques are being applied to the exploitation of plants as novel expression systems for the production and overproduction of heterologous and native proteins Transgenic plant technology is currently used in three broad areas the expression of combinant proteins to improve crop quality by increasing disease pest resistance or increasing tolerance to stress optimizing plant productivity and yield by the genetic manipulation of metabolic pathways and the large scale cost effective production of recombinant proteins for use as specialist industrial or therapeutic biomolecules The intention of Recombinant Proteins from Plants is to provide comprehensive and detailed protocols covering all the latest molecular approaches Because the production of transgenic plants has become routine in many laboratories coverage is also given to some of the more classical approaches to the separation analysis and characterization of recombinant proteins The book also includes areas of research that we believe will become increasingly important in the near future efficient transformation of monocots with Agrobacterium optimizing the stability of recombinant proteins and a section highlighting the immunotherapeutic potential of plant expressed proteins

Instrumentation, Control and Automation of Water and Wastewater Treatment and Transport Systems R. Briggs, 2013-09-24 Instrumentation Control and Automation of

Water and Wastewater Treatment and Transport Systems documents the proceedings of the 5th IAWPRC Workshop held in Yokohama and Kyoto Japan 26 July 3 August 1990 The papers presented at this Workshop have emphasized the following aspects new sensor technology based on developments in electrochemistry fiber optics and electro optics research into materials such as those needed to produce membranes of the required selectivity for immobilization of reactive species and for addition of reagents and standards the use of inferential measurements coupled with expert system technology the ever increasing power of microprocessors and the continuing reduction in their unit costs better communications capability improved mathematical modeling an increased awareness of the improved management that results from the timely availability of relevant data to the appropriate levels in the management hierarchy This book together with the proceedings of previous workshops provides what is probably the most comprehensive account of the state of the art and recent developments in instrumentation control and automation as applied to the water and water using industries and as such will be invaluable to the practitioner the researcher and the student community      *Omega 3 Fatty Acid Research* M. C. Teale, 2006 EPA and DHA omega 3 fatty acids are contained in oily fish such as salmon lake trout tuna and herring These fatty acids are not essential to the diet however scientific evidence indicates that these fatty acids may be very beneficial in reducing Coronary Heart Disease among other things This book brings together some of the recent studies on this important and interesting substance      *Sys Admin* ,2002
