**Prime Cause of Cancer** Otto Warburg, Trung Nguyen, 2015-12-02 This is book 2 of 5 of the Understand Cancer series It is based on the best available science The SECONDARY causes of cancer were discussed in book one This book continues from book one and discusses the PRIME cause of cancer as discovered by Nobel Prize Laureate Dr Otto Warburg considered by many as the founder of modern biochemistry There are prime and secondary causes of diseases For example the prime cause of the plague is the plague bacillus but secondary causes of the plague are filth rats and the fleas that transfer the plague bacillus from rats to man By a prime cause of a disease I mean one that is found in every case of the disease Cancer above all other diseases has countless secondary causes But even for cancer there is only one prime cause Summarized in a few words the prime cause of cancer is the replacement of the respiration of oxygen in normal body cells by a fermentation of sugar All normal body cells meet their energy needs by respiration of oxygen whereas cancer cells meet their energy needs in great part by fermentation All normal body cells are thus obligate aerobes whereas all cancer cells are partial anaerobes From the standpoint of the physics and chemistry of life this difference between normal and cancer cells is so great that one can scarcely picture a greater difference Oxygen gas the donor of energy in plants and animals is dethroned in the cancer cells and replaced by an energy yielding reaction of the lowest living forms namely a fermentation of glucose Dr Otto Warburg

**And the Meadow Lark Sang** Margaretha Willms,2011 Stories are blessings and with this volume of memoirs Margaretha Willms leaves a legacy of gifts for future generations This collection of stories radiates the simplicity of a carefree childhood of growing up and changing with the seasons of life a reminder of the repetition and rhythm of nature on the prairies and the assurance of a coming spring when the meadowlark sings once again Deep in every family background are the ethnic and religious values of their ancestors and it is important to preserve them by passing on stories connected to the places where those values found fullness in everyday living Margaretha writes A person is bound to their place of birth to the home of their childhood to the graves of their parents and to customs and traditions even if only in memory and history is a journey into that memory In recording moments of time about living through the hardships of the Great Depression she often finds humour in describing what seem in their proper perspective to lend themselves to rather amusing explorations Her story is told with candid unflinching honesty giving a glimpse of Mennonite social and religious traditions that made life unique Margaretha s sensitive portrayal of country schools in which her husband taught in the 1950s revives the spirit of rural schools as the heart and soul and pulse of every community in their time Something of the prairies survives in the melody of the meadowlark and the stories in Margaretha Willms book are also sustained for the future memories of the past
