Encyclopedia of Perception E. Bruce Goldstein, 2009-09-15 The field of perception is devoted to explaining the operation of the senses and the experiences and behaviors resulting from stimulation of the senses Perceptual processes such as recognizing faces seeing color hearing music and feeling pain represent the actions of complex mechanisms yet we usually do them easily The Encyclopedia of Perception presents a comprehensive overview of the field of perception through authoritative essays written by leading researchers and theoreticians in psychology the cognitive sciences neuroscience and medical disciplines It presents two parallel and interacting approaches the psychophysical or determining the relationship between stimuli in the environment and perception and the physiological or locating the biological systems responsible for perception Are there any processes not associated with perception Surely there are but the pervasiveness of perception is truly impressive and the phenomena of perception and its mechanisms are what this encyclopedia is about

Key Features Contains 16 pages of color illustration and photography to accompany the entries Offers a varied and broad list of topics including basic research as well as methodologies theoretical approaches and real world applications of perceptual research Emphasizes human perception but includes ample research because of its importance in its own right and because of what this research tells us about human perception Written by recognized experts from many disciplines but for an audience with no previous background in perception students and members of the general public alike

Key Themes Action Attention Audition Chemical Senses Cognition and Perception Computers and Perception Consciousness Disorders of Perception Illusory Perceptions Individual Differences Human and Comparative Across Species Not Including Ageing Disorders and Perceptual Development Methods Perceptual Development Experience Philosophical Approaches Physiological Processes Sense Interaction Skin and Body Senses Theoretical Approaches Visual Perception
