*Being Ecological, with a new preface by the author* Timothy Morton, 2025-04-08 From our most popular guide to the new epoch Guardian a new edition of the book about ecology without information dumping guilt inducing or preaching to the choir Ecology books can be confusing information dumps that are out of date by the time they hit you Slapping you upside the head to make you feel bad Grabbing you by the lapels while yelling disturbing facts Handwringing in agony about What are we going to do This book has none of that Being Ecological reissued with a new preface doesn t preach to the eco choir It s for you even Timothy Morton explains if you re not in the choir even if you have no idea what choirs are You might already be ecological After establishing the approach of the book no facts allowed Morton draws on Kant and Heidegger to help us understand living in an age of mass extinction caused by climate change They discuss what sorts of actions count as ecological starting a revolution going to the garden center to smell the plants And finally they explore a variety of current styles of being ecological a range of overlapping orientations rather than preformatted self labeling Caught up in the us versus them or you versus everything else urgency of ecological crisis Morton suggests it s easy to forget that you are a symbiotic being entangled with other symbiotic beings Isn t that being ecological

*The Ketogenic Diet* Lyle McDonald, 1998

**e-Learning and the Science of Instruction** Ruth C. Clark, Richard E. Mayer, 2016-02-19 The essential e learning design manual updated with the latest research design principles and examples e Learning and the Science of Instruction is the ultimate handbook for evidence based e learning design Since the first edition of this book e learning has

grown to account for at least 40% of all training delivery media. However, digital courses often fail to reach their potential for learning effectiveness and efficiency. This guide provides research-based guidelines on how best to present content with text, graphics, and audio, as well as the conditions under which those guidelines are most effective. This updated fourth edition describes the guidelines, psychology, and applications for ways to improve learning through personalization techniques, coherence, animations, and a new chapter on evidence-based game design. The chapter on the Cognitive Theory of Multimedia Learning introduces three forms of cognitive load, which are revisited throughout each chapter as the psychological basis for chapter principles. A new chapter on engagement in learning lays the groundwork for in-depth reviews of how to leverage worked examples, practice, online collaboration, and learner control to optimize learning. The updated instructor's materials include a syllabus, assignments, storyboard projects, and test items that you can adapt to your own course schedule and students. Co-authored by the most productive instructional research scientist in the world, Dr. Richard E. Mayer, this book distills copious e-learning research into a practical manual for improving learning through optimal design and delivery. Get up to date on the latest e-learning research. Adopt best practices for communicating information effectively. Use evidence-based techniques to engage your learners. Replace popular instructional ideas such as learning styles with evidence-based guidelines. Apply evidence-based design techniques to optimize learning games. e-Learning continues to grow as an alternative or adjunct to the classroom and correspondingly has become a focus among researchers in learning-related fields. New findings from research laboratories can inform the design and development of e-learning. However, much of this research published in technical journals is inaccessible to those who actually design e-learning material. By collecting the latest evidence into a single volume and translating the theoretical into the practical, *e-Learning and the Science of Instruction* has become an essential resource for consumers and designers of multimedia learning.
