Blood Matters Bonnie Lander Johnson, Eleanor Decamp, 2018-03-26 In late medieval and early modern Europe definitions of blood in medical writing were slippery and changeable blood was at once the red fluid in human veins a humor a substance governing crucial Galenic models of bodily change a waste product a cause of corruption a source of life a medical cure a serum appearing under the guise of all other bodily secretions and after William Harvey's discovery of its circulation the cause of one of the greatest medical controversies of the premodern period Figurative uses of blood are even more difficult to pin down The term appeared in almost every sphere of life and thought running through political theological and familial discourses *Blood Matters* explores blood as a distinct category of inquiry and draws together scholars who might not otherwise be in conversation Theatrical and medical practice are found to converge in their approaches to the regulation of blood as a source of identity and truth medieval civic life intersects with seventeenth century science and philosophy the concepts of class race gender and sexuality find in the language of blood as many mechanisms for differentiation as for homogeneity and fields as disparate as pedagogical theory alchemy phlebotomy wet nursing and wine production emerge as historically and intellectually analogous The volume's essays are organized within categories derived from medieval and early modern understanding of blood behaviors Circulation Wounds Corruption Proof and Signs and Substances thereby providing the terms through which interdisciplinary and cross period conversations can take place Contributors Helen Barr Katharine Craik Lesel Dawson Eleanor Decamp Frances E Dolan Elisabeth Dutton Margaret Healy Dolly Jørgensen Helen King Bonnie Lander Johnson Hester Lees Jeffries Joe Moshenska Tara Nummedal Patricia Parker Ben Parsons Heather Webb Gabriella Zuccolin

Medicine in the English Middle Ages Faye Getz, 1998-11-02 This book presents an engaging detailed portrait of the people ideas and beliefs that made up the world of English medieval medicine between 750 and 1450 a time when medical practice extended far beyond modern definitions The institutions of court church university and hospital which would eventually work to

separate medical practice from other duties had barely begun to exert an influence in medieval England writes Faye Getz Sufferers could seek healing from men and women of all social ranks and the healing could encompass spiritual legal and philosophical as well as bodily concerns Here the author presents an account of practitioners English Christians Jews and foreigners of medical works written by the English of the emerging legal and institutional world of medicine and of the medical ideals present among the educated and social elite How medical learning gained for itself an audience is the central argument of this book but the journey as Getz shows was an intricate one Along the way the reader encounters the magistrates of London who confiscate a bag said by its owner to contain a human head capable of learning to speak and learned clerical practitioners who advise people on how best to remain healthy or die a good death Islamic medical ideas as well as the poetry of Chaucer come under scrutiny Among the remnants of this far distant medical past anyone may find something to amuse and something to admire The Jews of Poland Edouard de Pomiane,1985 **Cooking through**
