Selected Problems in Physical Chemistry Predrag-Peter Ilich, 2010-06-17 The latest authors like the most ancient strove to subordinate the phenomena of nature to the laws of mathematics Isaac Newton 1647 1727 The approach quoted above has been adopted and practiced by many teachers of chemistry Today physical chemistry textbooks are written for science and engineering majors who possess an interest in and aptitude for mathematics No knowledge of chemistry or biology not to mention poetry is required To me this sounds like a well defined prescription for limiting the readership to a few and carefully selected I think the importance of physical chemistry goes beyond this precept The subject should benefit both the science and engineering majors and those of us who dare to ask questions about the world around us Numerical mathematics or a way of thinking in mathematical formulas and numbers which we all practice when paying in cash or doing our tax forms is important but should not be used to subordinate the infinitely rich world of physical chemistry

comprehension by adding new concepts while reviewing and rehearsing key material throughout the year This method is implemented in carefully crafted exercises quizzes and the textbook narrative and it facilitates learning mastery and retention Students appreciate the smaller profile and lighter weight of our books This is possible because of aspects of our Textbook Philosophy When mastery is the goal you must cull down the material to an amount that can reasonably be mastered in one year Related subjects are integrated into the narrative The history of modern chemistry mathematics and technical communication is emphasized throughout Integration protects a course from seeming compartmentalized from other subjects That s certainly not how the real world is Real chemists use math and writing skills every day Their knowledge about how the scientific enterprise works is greatly enhanced by their knowledge of great scientists who came before Our approach to implementing a Kingdom Perspective does not entail unnaturally inserting Bible verses or devotional insets A better approach for Christians is to do science from the faith informed perspective of disciples of Christ studying God s created order This is apparent in General Chemistry from the observations about order in the universe in how nature submits to scientific study and modeling and in the fitness of creation as a habitat for humanity and animal life **New Rudman's**
