Poirier, Pierre Moreau, 2012-11-09 This monograph is dedicated to one of the discoverers of poly ADP ribose Professor Paul Mandel from the Centre de Neurochimie in Strasbourg We would like to congratulate him for his distinguished contributions to the field of poly ADP ribosyl ation and express our gratitude for his support in the last years and particularly for his encouragement for the organization of this meeting Poly ADP ribose was discovered more than 25 years ago Since then excellent progress has been made on the study of the

mechanisms of poly ADP ribose reaction The last five years have been particularly exciting since the development of various molecular biology techniques has revealed the complex nature of this multifunctional enzyme Looking at the contributions presented at this meeting it becomes obvious that more work at the molecular level is needed Most likely these experiments will shed some light on the functions of poly ADP ribose but further iophysical studies will still be required to fully understand this complex enzymatic system **Research Awards Index** ,1982 **Dissertation Abstracts International** ,1987 **Subject Index of Current Extramural Research Administered by the National Cancer Institute** National Cancer Institute (U.S.),1977 Provides information concerning research grants and contracts supported by the National Cancer Institute **Verzeichnis lieferbarer Bücher** ,1988
