Nmmu 2016 Application:

Achieving Nelson Mandela University? Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa's higher education sector is rooted in the country's divided past. A significant State-driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities. But just over two decades later, for a variety of reasons, the higher education sector in South Africa appears beset with numerous challenges. Nelson Mandela University is one of the public universities that emerged from the restructuring process. The university is in an ongoing state of evolution of becoming. It developed out of the amalgamation of the University of Port Elizabeth, Port Elizabeth Technikon, and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005. In 2017 it was renamed Nelson Mandela University after the world-renowned statesman rather than the metropolitan area in which the university is primarily located. The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society, striving to be the academic expression of the values and ethos of its iconic namesake. Endeavouring to be something greater and different from the norm imbues its strategy, public statements and practices. The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar. A cross-section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution. While Nelson Mandela University has performed the usual work expected of any university, it has also sought to turn the university outwards to achieve a higher purpose, framing itself as a values-based university on a journey to become something else. In *Achieving Nelson Mandela University*, the university attempts to give an account of itself. The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go. Open Learning as a Means of Advancing Social Justice Tabisa Mayisela, Shanali Govender, 2024-01-23 This volume investigates the uptake of open learning in South African Technical Vocational Education and Training (TVET) colleges and higher education institutions. Comprised of 16 studies focused on activities at a range of colleges and universities across the country, these chapters aim to promote a better understanding of open learning practices across the Post-School Education and Training (PSET) sector, including issues such as recognition of prior learning, access for students with disabilities, work-integrated learning, professional development, novel student funding mechanisms, leadership for open educational practices, institutional culture, student support, blended and online learning, flexible learning, online assessment, open educational resource development, models and funding, and micro-credentials. This collection of peer-reviewed chapters contributes to understanding the ways in which South African PSET institutions and educators are interpreting open learning as a means of advancing social justice. It includes a historical and contemporary

understanding of the economic cultural and political obstacles facing PSET drawing on Nancy Fraser s theory of social justice as participatory parity to better understand the ways in which open learning may address systemic social injustices in order to allow South African students and educators to thrive This volume emerges from research conducted by the Cases on Open Learning COOL project an initiative by the Department of Higher Education and Training in partnership with the Centre for Innovation in Learning and Teaching CILT at the University of Cape Town UCT in South Africa

Anchored in Place Leslie Bank,Nico Cloete,2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges

exacerbated by structural inequalities in many African societies This in turn requires a more pragmatic approach grounded in respect for human rights Exploring the link between poverty and human rights in Africa will be useful to researchers policymakers students activists and others interested in addressing poverty Table of Contents PREFACE viii

Transforming Universities in South Africa, 2020-08-31 The idea of transformation in higher education underpins all policy documents academic literature and on going debates in South Africa Transforming Universities in South Africa Pathways to Higher Education Reform responds to the pressing need to comprehensively review the post apartheid experience and assess where South Africa s higher education stands across the continent and globally particularly within the country s efforts to overcome decades of socio economic imbalances It addresses the question of whether South Africa s transformation strategy from apartheid to democracy was simply a symbolic new flag raising and new anthem singing

exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally This volume s ultimate purpose is to provide a basis for imagining new futures in which South Africa higher education in the context of Africa and the global world takes centre stage
