G. Grant,Jill M. Gradwell,2010-07-16 In the case studies that make up the bulk of this book middle and high school history teachers describe the decisions and plans and the problems and possibilities they encountered as they ratcheted up their instruction through the use of big ideas Framing a teaching unit around a question such as Why don t we know anything about Africa offers both teacher and students opportunities to explore historical actors ideas and events in ways both rich and engaging Such an approach exemplifies the construct of ambitious teaching whereby teachers demonstrate their ability to marry their deep knowledge of subject matter students and the school context in ways that fundamentally challenge the claim that history is boring **Global History and Geography** Henry J. Brun,2001 TofC cont Global nationalism Economic and social revolutions Growth of imperialism A half century of crisis and achievement 1900 1945 Medical scientific and technological advances of the early 20th century World War I Post World War I era World War II 20th century since 1945 Cold War Postwar developments in Africa Asia and the Middle East Late 20th century developments in Europe Developing world in the late 20th century Global connections and interactions Global economic trends Search for global security Global trends and issues of the late 20th century **Reviewing Global History and Geography** Henry Brun,2000-03-15 This book is intended to serve as an intensive review to prepare students to master the mandated New York State Regents examination *Social Studies and Diversity Education* Elizabeth E. Heilman,Ramona Fruja,Matthew Missias,2010-01-21 This one of a kind resource features ideas from over one hundred of our nation s most thoughtful teacher educators reflecting on their best practices and offering specific strategies through which future teachers learn to teach Discipline Problems Tadashi Dozono,2024-05-07 Angel a Black tenth grader at a New York City public school self identifies as a nerd and likes to learn But she s troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas presenting a sugar coated image of the United States that is at odds with her everyday experience The history I learned in school is simpler she says The world I live in is a lot more complex Angel like every student interviewed in Discipline Problems has been identified by teachers as a troublemaker a student whose behavior disrupts classroom norms and interferes with instruction But her critiques of the curriculum she s taught speak to her curiosity and insight crucial foundations for understanding history Like many students who have been marginalized by systemic racism in American schools she exposes the shortcomings of her classrooms academic environments by challenging both the content and the methods of her education All too often these challenges are framed as troublemaking and the students are disciplined for acting out instead of being rewarded for their intellectual engagement Tadashi Dozono a professor of education and former high school social studies teacher takes seriously the often overlooked

critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum He reinterprets troublemaking usually cast as a behavioral deficit as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners

Wright-Maley,2018-10-01 John Dewey wrote in multiple places that education should be an experience of the content and processes of life itself Too often social studies is taught in a way that tells students about real life but fails to engage them in the process of life for which Dewey advocated The core purpose of simulations is to reflect the processes events and phenomena expressed in a variety of real life domains They engage students in these reflections of real life meaningfully as active agents who have the power to make decisions that impact the direction of events and that lead to both intended and unintended consequences Because of the nature of simulations students who participate in them are able to build their capacities to think in complex and critical ways Today despite the growing evidence that simulations have an important role to play in the teaching of social studies they remain an underutilized and undervalued approach to the discipline One of the key obstacles to their widespread adoption is the limited availability of training resources available to social studies teachers Teachers need support to develop a new vision of social studies teaching and learning coupled with practical guidance necessary to implement simulations effectively This volume provides teachers with both When teachers are able to weave simulations effectively into the fabric of social studies teaching and learning they help to promote social studies experiences that are both powerful and purposeful They offer students an experience of the discipline that is indeed *More Like Life Itself*

Measuring History S. G. Grant,2009-03-01 Measuring History complements the cases presented in *Wise Social Studies Practices* Yeager Davis 2005 Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state level testing In this book the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them At the heart of *Measuring History* are cases of classroom teachers in seven states Florida Kentucky Michigan New York Texas Mississippi and Virginia where new social studies standards and new and generally high stakes state level history tests are prominent In these chapters the authors describe and analyze the state s testing efforts and how those efforts are being interpreted in the context of classroom practice The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform Catherine Horn University of Houston and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment the research literature and the technical qualities of history tests Journal of Social Studies Research ,2012 **Assessing**

with Respect Starr Sackstein, 2021-03-24 In this timely and thoughtful call to action author and educator Starr Sackstein examines the critical intersection between assessment and social and emotional learning SEL particularly as it affects students of color and other marginalized groups The book addresses the five SEL competencies identified by the Collaborative for Academic Social and Emotional Learning CASEL self awareness self management social awareness relationship skills and responsible decision making and explains how teaching students to develop their abilities in these areas can help them improve their learning and assessment experiences Sackstein also raises important considerations for educators urging them to Examine their implicit biases to improve their relationships with students Deepen their understanding of the impact of grades and assessments on students self image and their ability to reach their full potential as learners Develop personalized assessment systems that ensure an accurate fair and equitable portrayal of what students know and can do In addition to presenting the relevant research Sackstein draws from personal experience and the reflections of students teachers and administrators to present a compelling case for approaching assessment through the SEL lens Educators at all levels who have witnessed the devastating effects that testing can have on students beliefs in themselves as learners will find *Assessing with Respect* to be an invaluable guide to ensuring better outcomes and better emotional health for all students
