Decentralization, Local Governance, and Localizing the Sustainable Development Goals in Asia and the Pacific Bruno Carrasco, Hanif A. Rahemtulla, Rainer Rohdewohld, 2022-10-12. Since its adoption in 2015, the 2030 Agenda on Sustainable Development has shaped not only international development cooperation but also the design of national trajectories for social and economic development. In tandem with other global agendas adopted that year, such as the Paris Agreement on Climate Change and UN Habitat's New Urban Agenda, it remains the global and regional blueprint for sustainable development despite the COVID-19 pandemic. The term 'localizing the Sustainable Development Goals (SDGs)' has been used to capture the importance of subnational governments for achieving national SDG agendas. However, there is little deeper analysis of the required nexus between fiscal, political, and legal arrangements for SNGs, their involvement in national

policy arenas which discuss and decide on national SDG strategies and the need for locally disaggregated data systems on the one hand and effective SDG localization strategies on the other hand It is this aspect which the present publication explores in greater detail by using country examples and conceptual analyses The text will be of interest to policymakers scholars students and practitioners in public policy and public administration decentralization and sustainable development with a focus on the Asia and Pacific region The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivative License CC BY NC ND 3 0 IGO

Fees Must Fall Susan Booyesen,2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The

student movement has challenged the hierarchical top down leadership system of university management and it's double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution This book maps the contours of student discontent a year after the start of the FeesMustFall revolt Student voices dissect colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt *Becoming a Nurse* Derek Sellman,Paul Snelling,2016-10-04 The guidelines and skills required to become a nurse are always changing and it can be difficult to stay up to date with the current standards This book has been specifically designed to address the main skills you need to meet NMC requirements *Becoming a Nurse* will demystify what you need to know while preparing you to meet NMC standards and become a confident practising professional The book introduces the many subjects outside the biological which are none the less essential for both pre registration and practising nurses This new edition has been thoroughly updated throughout and includes four new chapters on psychosocial concepts for nursing sociological concepts for nursing spiritual care and preceptorship and transition Like the previous edition the book also covers Law ethics and policy Management and leadership Communication interpersonal skills and interprofessional working Evidence based practice Medicines management Public health and professional development Each chapter is packed full of case studies discussion question and further readings to encourage critical thinking and reflection It is an excellent resource to prepare you for your programme or to refresh your knowledge of NMC standards **Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2017** United States. States and the European Union in the areas of health safety and environmental standards He shows how large firms seek regulatory schemes that disproportionately disadvantage small firms When multinationals are embedded in the local economy governments too have an incentive to use these regulations to shift profits back home Today the key challenge to governing global trade is not how much trade occurs but who is allowed to participate and this book shows that new rules will be needed to allow governments to widen the benefits of global commerce and avoid further inequality and market concentration
