

OBJECTIVES OF RESEARCH

Research is defined as a systematised effort to gain new knowledge. It is referred to as the search for knowledge.

The main purpose of research is to find solutions to unsolved problems using scientific procedures and to understand various phenomenon scientifically.

The main objective of research is to find out a hidden, undiscovered truth.

The various objectives are –

1. Propose and test certain hypothesis that provide causal relationships between variables.
2. Discover and establish the existence of relationship, association and independence between two or more aspects of a situation or phenomenon.
3. Understand different phenomenon and develop new perceptions about it.
4. Study and describe accurately the characteristics of situations, problems, phenomenon, services, groups or individuals.
5. Explain the unexplored horizons of knowledge.
6. Test reported findings and conclusions on new data and novel conclusions on previously reported data.
7. Study the frequency of research that is connected with unspecified study.

Writing Human Factors Research Papers Don Harris, 2016-12-05 Writing high quality papers suitable for publication within international scientific journals is now an essential skill for all

early career researchers their career progression and the reputation of the department in which they work depends upon it. However many manuscripts are rejected or sent back for major re working not because the science they contain is in any way bad but because the same problems keep occurring in the way that the material is presented. It is one thing to write a good scientific paper however it is quite another thing to get it published. This requires some additional nous. In writing this book Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers and ultimately as a journal editor. By his own admission it contains all the things he wished that his mentors had told him 25 years ago but didn't. The material in the book is drawn from many years of finding all these things out for himself usually by trial and error but mostly error. The text adopts a much lighter touch than is normally found in books of this type after all who really wants to read a book about writing research papers. The author describes his own unique approach to writing journal papers which in his own words has proved to be extremely successful. All major points are illustrated with examples from his own published works. The book is written in the form of a manual for constructing a journal manuscript read a chapter write a section. However the material it contains goes beyond just this and also describes how to select a target journal the manuscript submission process what referees are looking for in a good journal paper and how to deal with the referees comments. Each chapter concludes with a checklist to ensure all the key elements have been addressed. **Writing and**

Publishing Science Research Papers in English Karen Englander, 2013-10-11 This book provides a comprehensive review of the current knowledge on writing and publishing scientific research papers and the social contexts. It deals with both English and non Anglophone science writers and presents a global perspective and an international focus. The book collects and synthesizes research from a range of disciplines including applied linguistics the sociology of science sociolinguistics bibliometrics composition studies and science education. This multidisciplinary approach helps the reader gain a solid understanding of the subject. Divided into three parts the book considers the context of scientific papers the text itself and the people involved. It explains how the typical sections of scientific papers are structured. Standard English scientific writing style is also compared with science papers written in other languages. The book discusses the strengths and challenges faced by people with different degrees of science writing expertise and the role of journal editors and reviewers. Research
