The new structure reflects changes in service delivery and includes sections on philosophy and theory, base the occupational therapy process, ensuring quality, the context of occupational therapy, occupations, client groups. Important new areas that are covered include mental health promotion, evidence-based practice, community development, and continuing professional development. It is written in a style that is easy to read and understand, yet there is enough depth to take students through to their final year of education. Chapters on the application of occupational therapy are written by practising clinicians, so they are up to date and realistic. For qualified occupational therapists, the book includes a review of current theories and approaches to practice, with references so that they can follow up topics of particular interest.
