the book Ports and Waterways Navigating the changing world written by the Ports and Waterways team part of the Civil Engineering and Geosciences faculty at Delft University of Technology It integrates the content of a number of separate lecture notes we used in our teaching activities and updates this information where relevant The integration reflects our vision that ports and waterways should be viewed as parts of a coherent system that supports waterborne supply chains and that their integral design and operation is essential

Jetties and Wharfs Crow,2021-04-04 For centuries jetties and wharfs have been designed and built around the world and play an important role in contemporary ports The difference in the use of jetties piers and wharfs is that jetties are frequently used for the transshipment and storage of light materials and ro ro traffic while piers are generally used for heavy loads like iron ore That is why piers are mostly designed and constructed like quay walls which are beyond the scope of this handbook The designs were originally based on trial and error and the insights of those who dared to conquer local conditions such as wind waves currents and soil composition Design and construction techniques have since evolved into the designs we see on the coast or in river ports and seaports nowadays The purpose of this handbook is to provide insight and guidelines regarding aspects that are important in the design of jetties and wharfs Jetty specific issues such as loads interfaces between materials installations on jetties and wharfs as well as detailing aspects are also covered This handbook is part of a series of Dutch port infrastructure design recommendations that include the Quay Walls handbook and Jetties and Wharfs handbook

Class Rules and Guides are developed and updated to keep pace with the maritime industry. This has resulted in a complex library of Class Rules and Guides. Many requirements are repeated throughout these Class Rules and Guides, making use and maintenance of Class Rules Guides increasingly cumbersome and bureaucratic. In addition to the consolidation of the current requirements, this book also includes guidance in the following areas based on the latest industry knowledge and experiences: Vortex Induced Motion (VIM) effect, Bending tension fatigue of mooring chains, Fiber rope mooring criteria, Mooring systems in squalls, Dynamically installed anchors, Anchor holding capacity, Mooring analysis methodology, Thruster assisted mooring.
