7 Configure the sensitivity and select the sensor.

Select the sensitivity appropriate for the application (see options below), replace the front cover, and apply power to the sensor. Right away after the LED stops flashing (see the LED operation section). Walk through the detection zones, observing the sensor's LED whenever motion is detected. The red LED shows when it detects motion.

The audible range of all PIR units is subject to variation because of different types of clothing, backgrounds, and ambient temperature. For this reason, expect that the most likely detector motion is well within the PIR's detection zones and that with testing is carried out during these modes.

Note: This is the recommended sensitivity for applications with pet up to 10 kg (22 lb) and pet up to the Pet Immune lens.

Note: This is the recommended sensitivity for applications with pet up to 10 kg (22 lb) and pet up to the Pet Immune lens.

Note: For High Security applications, use the High Security lens, disable the LED (S1=OFF), and set the sensitivity to high (S1 and S2=ON).

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him.
