

# A Visual Guide To Solving A Rubik's Cube

## Notation

### Sides

### Moves

- Bright green represents sufficient blocks in the correct spot, but not the correct orientation

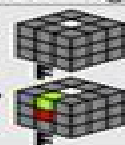

### Example:

## Goal

Cross on U  
Represent matching on sides  
Represent in correct spots

## Starting Position & Algorithms

This can easily be accomplished logically, just concentrate on getting the correct orientation pieces  
If you get a piece in the right spot, but the wrong orientation, just use the algorithm

$F' U L' U'$

## End Result

100% done

Starting top corners in match quickly search for the corner pieces with the same color as the cross (I like the cross to be white as you can refer to the corner pieces as Italy, Mexico, The Netherlands, and Ireland). If you know your national flag!

The white (for explanations sake) can be in three places:  
- Represent that not matching to corner of U  
- Bottom corners of the sides (closest to cross)

- Knock it out of this position with a simple move like  $R' D R$  to get to "U"
- Knock it out of this position with a simple move like  $R' D R$  to get to "U"
- If on left side of cube, place on U where F and B are the associated colors. If on right side of cube, place on D where F and L are the associated colors.

...if on left:  $R' D R$   
...if on right:  $L D' L'$

Top corners matching on sides

Place top corner to solve in upper right corner of U

Flip the cube up/down

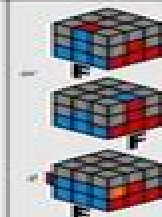

$R' D R D'$  repeat until successful

100% done

Middle layer all matching

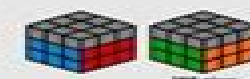

Use either algorithm to randomize squares to find starting position

$U R U' R' U' F' U F$

$U' L' U L U F U' F'$

This is a shortcut that flips two opposing middle-edge pieces on the same face, **not required**  
 $F F U F F U F F$

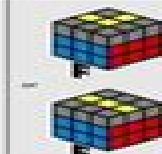

100% done

Cross on U  
Any three representations matching

Complete algorithm to get to starting position

Rotate U' until two representations match

$F R U R' U' F'$  and repeat for

$F R U R' U' F'$  then rotate U' to get...

100% done

100% done

All representations matching on sides

$R U R' U R U R'$  and repeat for

$R U R' U R U R'$

then rotate U' to line up the representations

100% done

All representations in correct spots

If no representations are in a correct spot, just do the algorithm from any side  
Repeat for each representation that needs to be corrected

$U R U' L' U R' U' L$

All representations matching

Place top corner to solve in upper right corner of U

Rotate  $D M D'$  U until unsolved square is in correct position (downright of U)  
The cube will look more up but just keep following the algorithm and **Keep Rubik**

$R' D R D'$

$R' D R D'$

always complete the algorithm before rotating U

Before the Rubik's cube and last movements
