Russian Oil Gas Report:

Russia's Oil and Natural Gas Michael Ellman, 2006 Explores the role of Russian oil and gas in the Russian economy

Belarus: Oil, Gas, Transit Pipelines and Russian Foreign Energy Policy Margarita M. Balmaceda, 2006 Belarus relies on Russia for about 85% of its total energy needs while Russia needs Belarus oil and gas pipelines to export its supplies to Western Europe How will energy exports from Russia and Belarus transit capabilities impact Western Europe if this interdependent relationship ends either through political changes in Belarus or if Russia ends its energy subsidies to Belarus This report looks at transit infrastructure and investment issues and analyzes both the state of the current infrastructure as well as the possibilities this transit opens to Western investors particularly as the Yamal Pipeline nears completion In addition it looks at the current conflict between Belarus and Russian investors for control of the country's gas transit system and oil refineries This series of reports establishes for the first time the confluence of Russian foreign policy with the acquisition of foreign energy assets by Russian entities Nine specific country profiles focus on the oil gas electricity and nuclear power industries Each report written by an author of international standing explains how Russian foreign energy downstream mergers and acquisitions are transpiring to consolidate the new Russian empire

The Future of Russian Gas and Gazprom Jonathan P. Stern, 2005 The Russian gas industry provides 50% of Russian domestic energy supplies a substantial proportion of CIS gas supplies and around 20% of European gas demand Declines in production at existing fields mean that Gazprom will face increasingly difficult decisions about moving to higher cost fields on the Yamal Peninsula The alternative will be increasing imports from Central Asian countries and allowing other Russian gas producers to increase their role in the industry Russian exports to Europe will gradually increase and deliveries of Russian LNG will commence to Asia and the both coasts of North America Pipeline gas deliveries to East Asian countries may have a longer time horizon Export projects aimed at new markets will depend crucially on the maintenance of oil and gas prices at the levels of 2003-05 European exports will also depend on the pace of EU market liberalisation and Gazprom's ability to agree mutually acceptable terms for transit principally with Ukraine and Belarus Reform liberalisation and restructuring of the Russian gas industry have been more substantial than has generally been recognised Most important has been price reform which in 2005 allowed Russian industrial customers to become profitable to serve at regulated prices Price increases may significantly reduce future increases in domestic gas demand The increasing need for production from companies other than Gazprom will ensure that liberalised access to networks expands considerably over the next decade In the 2000s Gazprom reclaimed its CIS gas business from intermediaries while maintaining its de facto monopoly of exports to Europe and establishing a similar degree of authority over future exports to Asia The merger of Gazprom and Rosneft will provide the potential to become a force in the domestic and international oil markets particularly given the authority that the president has conferred on the company in terms of Russian energy policy

China Oil & Gas Report, 1996 *Russian Energy Security and Foreign*

Policy Adrian Dellecker, Thomas Gomart, 2011-05-03 This book provides an original and thoroughly academic analysis of the link between Russian energy and foreign policies in Eurasia as well as offering an interpretation of Russia's coherence on the international stage seeking to understand Russia and explain its behaviour. The authors analyse both energy and foreign policies together in order to better grasp their correlation and gain deeper understanding of broader geopolitical issues in Eurasia at a time when things could go either way towards producers or towards consumers. Questioning the concept of energy deterrence which aims to fuel uncertainty in Russia's relations with its partners as well as projecting its overall power on the international scene, this provocative volume seeks to stimulate debate on this very important issue. Assessing the weight that energy has in Russia's foreign policy and in its pursuit of power on the international stage, this book will be of interest to students and scholars of international relations, energy politics, geopolitics and Russian and Central Asian Studies.

Power Struggles Se Hyun Ahn, 2022-10-03 This book explores East Asia's and the Asia Pacific's energy security, exploring key issues including major trans-border energy projects, major country's energy mix, policy, trans-border pipelines, LNG transfer between nations, balance of power, relations between major powers, the North Korean energy situation, energy alliances, Belt and Road Initiative, Indo-Pacific Strategy, World Choke point and more. In particular, this book provides the detailed analysis of the current problems of energy security and diplomacy among various countries as well as policy implications. It will clearly serve as a manual to enhance energy security in the region and boost energy transaction as well as the pioneering step to conceptualize the notion of energy security among political circles in the diplomatic community and energy industry as well as international relations academics.

Russian Involvement in Eastern Europe's Petroleum Industry Adnan Vatansever, 2005 This report answers questions such as: as one of the largest foreign acquisitions by a Russian company occurred in Bulgaria, what lessons are applicable to charting future Russian downstream takeovers? Why have Eastern Europe and Western FSU countries been the primary focus of Russian acquisitions? What drives LUKoil and other Russian oil companies to pursue acquisition of assets in these regions? Finally, what is the stance of the Russian government in terms of promoting such acquisitions abroad? This series of reports establishes for the first time the confluence of Russian foreign policy with the acquisition of foreign energy assets by Russian entities. Nine specific country profiles focus on the oil, gas, electricity and nuclear power industries. Each report, written by an author of international standing, explains how Russian foreign energy downstream mergers and acquisitions are conspiring to consolidate the new Russian empire.

Russian Environmental Politics Ellie Martus, 2017-07-06 This book explores how policymaking works in Russia, focusing on the important field of environmental policy. It argues that contrary to the prevailing view that power is concentrated in the president's hands, policy is in fact made by the bureaucracy and influential industry and industrial

association lobbyists

The Russian Far East and Pacific Asia M. J. Bradshaw, 2013-07-04 This major study assesses prospects for economic recovery in the Russian Far East evaluating foreign trade and investment political and economic forces patterns of resource supply and needs in Pacific Asia and potential competitors It concludes that this unfulfilled potential has as much to do with conditions in Russia as the downturn caused by the Asian crisis *Russia, the Asymmetric Threat to the United States* John Wood, 2009-06-22 Exploring themes critical to understanding the current world order this book lays bare the reality of the new Russia that emerged under Vladimir Putin Russia holds the world's largest natural gas reserves the second largest coal and uranium reserves and the eighth largest oil reserves Europe is dependent on Russia for 25 percent of its oil and gas Russia is also positioning itself to play a similar role with respect to China The key to this strategy is a network of new oil and natural gas pipelines that Russia is in the process of constructing which will bypass the problematic Ukraine Georgia Poland and the Baltic States in the West and lock in the enormous potential of China in the East Further as the Western economies including the USA begin themselves to recover their growing energy dependence will come back into the forefront and therefore the need to ensure that Russia does not fail in its opening up of new energy resources in the Arctic and Eastern Siberia Russia is no longer a superpower in the Cold War sense of the word because its military is significantly weaker and as such is incapable of conducting a regional let alone global war against either the United States or NATO It is precisely because of its military weakness that Putin has been forced to adopt an asymmetric approach Thus the pipeline spigot and the proliferation of missiles and aircraft have become Russia's weapons of choice along with an ever growing reliance on its strategic nuclear forces to provide it with the necessary deterrent to foreign aggression In addition Putin and Medvedev have no interest in an arms race with the United States it is too costly and detracts from their priority which is economic reform From Putin's perspective America is in the process of imposing absolute security or as Joint Vision 2020 put it full spectrum dominance over the world As the sole remaining superpower the United States enjoys a massive strategic imbalance in its favor which it has used first to contain but now with the intent to control the world How NATO expansion lays the groundwork for a U S global missile defense system to contain perceived adversaries such as Russia which in turn secures the dominance of America through its Prompt Global Strike PGS capability the ability to strike anywhere on the planet with impunity within 90 minutes of the order being given by The President Thus PGS will be to the 21st Century what British Gun Boat Diplomacy was to the 19th Century In such a context Russia is forced to respond asymmetrically Russian Oil Companies in an Evolving World Indra Overland, Nina Poussenkova, 2020-08-28 This book examines Russia's capacity to respond to a changing world through the lens of the country's oil industry Against a backdrop of social political and climatic change Indra Overland and Nina Poussenkova present a systematic analysis of how modern energy developments in the form of shale oil offshore oil and the global energy transition are handled **The United States and Northeast Asia** G. John Ikenberry, Chung-in Moon, 2007-12-24 Since World War II the United States has

played a crucial role in shaping Northeast Asian politics and economics. However, as this authoritative book shows, the Cold War's demise, September 11, and America's major strategic realignments have unleashed seismic changes in the region. China's rise, Japan's quest for a normal state, and the North Korean nuclear quagmire are also potential flashpoints. Collective memories of past aggression, as well as resurgent nationalism, further complicate regional dynamics. But hopeful signs abound: as deepening economic interdependence, expanding social and cultural exchanges, and the proliferation of informal economic, social, and cultural networks have improved the chances for a peaceful evolution to a liberal and stable region.

Contributions by: Vinod K Aggarwal, Paul Bacon, Avery Goldstein, G John Ikenberry, Takashi Inoguchi, Ki Jung Kim, Myongsob Kim, Woosang Kim, Yongho Kim, Min Gyo Koo, Michael Mastanduno, Chung in Moon, Katharine H S Moon, Seung won Suh, and William C Wohlforth.

Policing Northeast Asia Se Hyun Ahn, 2020-06-02. This book explores the progress in and the obstacles surrounding developing comprehensive security cooperation between Russia and South Korea since diplomatic relations were established in 1991 within the framework of economic security. The book focuses on oil and natural gas projects linking the Trans-Siberian and Trans-Korean Railroads, industrial development in the Nakhodka Free Economic Zone, fishery cooperation, and the arms trade, and examines whether these five aspects of cooperation serve to contribute to building Russian-South Korean bilateral and regional economic security. The author argues that these five aspects of cooperation all have the potential to enhance comprehensive bilateral security and further regional economic security in Northeast Asia. However, Russian-South Korean economic cooperation has been hampered by a number of obstacles, including domestic factors as well as external factors, and prevented Russia and South Korea from fulfilling their potential for creating a cooperative comprehensive security relationship. The author concludes with an assessment on the utility of the concept of multi-dimensional security cooperation as a framework for studying and improving the prospects for Russian-South Korean bilateral relations.

Oil Xiaobing Li, Michael Molina, 2014-10-14. Despite ongoing efforts to find alternatives, oil is still one of the most critical and valuable commodities on earth. This two-volume set provides extensive background information on key topics relating to oil: profiles of countries that are major producers and consumers of oil, and examines relevant political issues. Aside from air and water, oil is perhaps the most valuable natural resource. Oil supplies the tremendous energy needs of the modern world. What exactly is oil? Where does it come from? How does it get consumed, and who is using it? This encyclopedia provides clear answers to these questions and more, offering students entries on the fundamentals of the oil industry and profiles of the countries that play a major role in oil production and consumption. Volume 1 presents topical entries on critical concepts, key terms, major oil spills and disasters, and important organizations and individuals relating to the oil industry. Entries define terms such as barrel and reserve cover incidents such as the BP oil spill and explain the significance of organizations such as OPEC. The second volume spotlights specific countries that are major producers, consumers, exporters, and importers of oil, from the United States to Russia to Saudi Arabia to Venezuela. Each profile shows readers the

importance of oil in that country through a brief background history data on its oil usage or production information about major trading partners and an explanation of political issues

Russian Energy Policy During President Putin's Tenure Danila Bochkarev, 2006 This important report looks at the policies and strategies President Putin has developed in the field of energy and at the current climate for foreign investors in the sector Russian energy policy is at an important watershed A substantial increase in the output of oil gas has led some analysts to view Russia as a reliable alternative to global dependence on energy supplies from the Gulf On the other hand there are concerns that current Russian energy strategy comes closer to the Venezuelan OCO model where foreign energy companies are welcome to invest but only on Moscow OCOs terms and in partnership with a state controlled national energy company How are these strategies unfolding and what are the lessons for private sector investors

The Regional and Local Shaping of World Society Mark Herkenrath, 2007 Globalization is usually seen as a uniform force producing similar social consequences across all societies affected The contributions in this volume challenge this notion by demonstrating that reactions to the same global changes vary across different parts of the world In particular this volume examines the crucial role of economically and politically integrated regions as mediators between global challenges and local responses To the extent that different regional reactions to global change retroact on their global context global social transformation becomes a highly complex phenomenon

Georgia: Russian Foreign Energy Policy and Implications for Georgia's Energy Security Liana Jervaldze, 2006 This report shows that as Georgia has restructured its energy sector the new Russian and Georgian political elites exerted their influence particularly through the participation of Russian gas company Itera in privatizations of Georgian gas enterprises And how over the past few years Russian Georgian business groups with their offshore capital have been working to monopolise the Georgian economy and Russia's gas industry has been consolidating its hold over the CIS pipeline infrastructure particularly through the expansion of Gazprom However Gazprom failed to take control of Georgia's pipeline infrastructure and Georgia is insistent on developing its pipeline potential in order to boost its role as a transit route to Europe Turkey and Iran This series of reports establishes for the first time the confluence of Russian foreign policy with the acquisition of foreign energy assets by Russian entities Nine specific country profiles focus on the oil gas electricity and nuclear power industries Each report written by an author of international standing explains how Russian foreign energy downstream mergers and acquisitions are transpiring to consolidate the new Russian empire

Russia's Energy Interests in Azerbaijan Fariz Ismailzade, 2006 In 2003 2004 an increased number of senior Russian officials and major energy companies such as Itera Gazprom and RAO UES visited Baku in the hopes of participating in energy projects in Azerbaijan While maintaining diplomatic relations with Moscow Azerbaijan is more hesitant when it comes to close cooperation with Russian energy companies Baku fears that if Russia gains more assets in Azerbaijan control of these assets will be used for political purposes This unique study looks at the confluence of Russian private and public sector interest Azerbaijan's energy

sector This series of reports establishes for the first time the confluence of Russian foreign policy with the acquisition of foreign energy assets by Russian entities Nine specific country profiles focus on the oil gas electricity and nuclear power industries Each report written by an author of international standing explains how Russian foreign energy downstream mergers and acquisitions are transpiring to consolidate the new Russian empire *Oil and the Economy of Russia* Nat Moser, 2017-10-20 This book examines the development of the Russian economy from tsarist times to the present through the lens of the oil industry It considers the role of the state business state relations foreign participation enterprise performance and technology Besides providing much rich detail on the changing nature of the oil industry the book also puts forward important conclusions including the fact that in the late nineteenth century private enterprise rather than the state was the principal driver of economic development and that after the collapse of the Soviet Union incumbent managers were more effective in running their companies than financier entrants whose main concern was short term gain
