address the committee's full statement of task and does not offer any recommendations because the committee is still in its early stages of data gathering. The committee will continue to gather and review information and conduct analyses through late spring 2014 and will issue its final report in late summer 2014. **Overcoming Barriers to Electric Vehicle Deployment** focuses on the light duty vehicle sector in the United States and restricts its discussion of electric vehicles to plug-in electric vehicles (PEVs) which include battery electric vehicles (BEVs) and plug-in hybrid electric vehicles (PHEVs). The common feature of these vehicles is that their batteries are charged by being plugged into the electric grid. BEVs differ from PHEVs because they operate solely on electricity stored in a battery; there is no other power source. PHEVs have internal combustion engines that can supplement the electric power train. Although this report considers PEVs generally, the committee recognizes that there are fundamental differences between PHEVs and BEVs.
