provides both legal and economic perspectives on antitrust analysis in China which is important given that economic analysis is increasingly adopted by China's antitrust agencies and the Chinese courts. Thus understanding the logic and methodology behind economic analysis as applied to Chinese cases is key to conducting proper antitrust legal analysis that is tailored to the Chinese context. To write a book on the burgeoning antitrust enforcement and practice for the constantly evolving Chinese market is a real challenge. The trick and it is not as easy as you would think is to write simple declarative sentences understandable to the antitrust layman and at the same time not lose the rigor of antitrust analysis. I think this relatively short book is a remarkable achievement in meeting such a challenge but I invite you to judge for yourself.

Exploring Best Practice For Home Warranty System (Penerbit USM) Sufardy Sibly, Abdul Aziz Hussin, Nor' Aini Yusof, 2019-08-09. Exploring Best Practice for Home Warranty System. Housing industry has been one of the major contributors towards the Malaysian economic growth in terms of its affiliation with other industries involving public and private sectors. Additionally the housing industry also provides mass employment opportunities. With the industry competitively expanding locally and globally the industry does not escape from problems such as abandoned projects, late delivery, fraud and defects. Due to housing demands there are different kinds of housing guarantee and warranty schemes being offered in various countries in order to entice the buyers besides promoting quality homes. The aim of this book is to highlight a few criteria that can be considered as the best practices of the home or housing warranty system. These criteria resulted from the detailed researches and comparison from related literatures and also from current practices in terms of its legislative control, political and economic influences, the knowledge process and the design. By combining all the features and the best practices this book proposes a framework to act as the guideline to determining whether the home warranty has been applied. Finally this book provides the reason for having proper home warranty system and its benefits to the house buyers in promoting safe, quality, affordable and sustainable products.
