**Conference Proceedings. New Perspectives in Science Education** Pixel, 2017 *Object Tracking Technology* Ashish Kumar, Rachna Jain, Ajantha Devi Vairamani, Anand Nayyar, 2023-09-25 With the increase in urban population it became necessary to keep track of the object of interest In favor of SDGs for sustainable smart city with the advancement in technology visual tracking extends to track multi target present in the scene rather estimating location for single target only In contrast to single object tracking multi target introduces one extra step of detection Tracking multi

target includes detecting and categorizing the target into multiple classes in the first frame and provides each individual target an ID to keep its track in the subsequent frames of a video stream One category of multi target algorithms exploits global information to track the target of the detected target On the other hand some algorithms consider present and past information of the target to provide efficient tracking solutions Apart from these deep learning based algorithms provide reliable and accurate solutions But these algorithms are computationally slow when applied in real time This book presents and summarizes the various visual tracking algorithms and challenges in the domain The various feature that can be extracted from the target and target saliency prediction is also covered It explores a comprehensive analysis of the evolution from traditional methods to deep learning methods from single object tracking to multi target tracking In addition the application of visual tracking and the future of visual tracking can also be introduced to provide the future aspects in the domain to the reader This book also discusses the advancement in the area with critical performance analysis of each proposed algorithm This book will be formulated with intent to uncover the challenges and possibilities of efficient and effective tracking of single or multi object addressing the various environmental and hardware challenges The intended audience includes academicians engineers postgraduate students developers professionals military personals scientists data analysts practitioners and people who are interested in exploring more about tracking Another projected audience are the researchers and academicians who identify and develop methodologies frameworks tools and applications through reference citations literature reviews quantitative qualitative results and discussions
