World Without Weight Daniel Povinelli, 2012 In every domain of reasoning humans deploy a wide range of intuitive theories about how the world works So are we alone in trying to make sense of the world by postulating theoretical entities to explain how the world works or do we share this ability with other species This is the focus of this new book from Daniel Povinelli

The Post-Liberal Imagination Bruce Baum, 2016-01-26 In *The Post Liberal Imagination* Bruce Baum approaches American liberalism in a critical spirit by examining the relationship between popular culture and politics The book analyzes movies television and popular music to rethink the liberal views of democracy equality racism dissent and animal rights in the Bush Obama era

The New Chimpanzee Craig Stanford, 2018-03-12 The history of research into the lives of wild chimpanzees now spans more than a half century since Jane Goodall began it all The past 20 years have seen tremendous advances in our understanding of our closest kin These include revelations about our very similar genomes but also many new discoveries about social behavior and ecology New cultural traditions and forms of tool use new evidence for the causes of violence new evidence of patterns of hunting and meat eating and much more Chimpanzees are new and different apes than they were at the close of the last century *The New Chimpanzee* synthesizes the findings of the past 20 years and offers new insights and interpretations of what researchers have learned *The New Chimpanzee* draws from results of the 7 longest term 25 55 years research projects from which we have learned the most about the species augmented by other shorter field projects conducted in recent years including my own

Wild Man from Borneo Robert Cribb, Helen Gilbert, Helen Tiffin, 2014-01-31 *Wild Man from Borneo* offers the first comprehensive history of the human orangutan encounter Arguably the most humanlike of all the great apes particularly in intelligence and behavior the orangutan has been cherished used and abused ever since it was first brought to the attention of Europeans in the seventeenth century The red ape has engaged the interest of scientists philosophers artists and the public at large in a bewildering array of guises that have by no means been exclusively zoological or ecological One reason for such a long term engagement with a being found

only on the islands of Borneo and Sumatra is that like its fellow great apes the orangutan stands on that most uncomfortable dividing line between human and animal existing for us on what has been called the dangerous edge of the garden of nature Beginning with the scientific discovery of the red ape more than three hundred years ago this work goes on to examine the ways in which its human attributes have been both recognized and denied in science philosophy travel literature popular science literature theatre museums and film The authors offer a provocative analysis of the origin of the name orangutan trace how the ape has been recruited to arguments on topics as diverse as slavery and rape and outline the history of attempts to save the animal from extinction Today while human populations increase exponentially that of the orangutan is in dangerous decline The remaining wild men of Borneo are under increasing threat from mining interests logging human population expansion and the widespread destruction of forests The authors hope that this history will by adding to our knowledge of this fascinating being assist in some small way in their preservation *The Routledge Handbook of Global Development* Kearrin Sims,Nicola Banks,Susan Engel,Paul Hodge,Jonathan Makuwira,Naohiro Nakamura,Jonathan Rigg,Albert Salamanca,Pichamon Yeophantong,2022-01-31 This Handbook provides a comprehensive analysis of some of the world s most pressing global development challenges including how they may be better understood and addressed through innovative practices and approaches to learning and teaching Featuring 61 contributions from leading and emerging academics and practitioners this multidisciplinary volume is organized into five thematic parts exploring changes in global development financing ideologies norms and partnerships interrelationships between development natural environments and inequality shifts in critical development challenges and new possibilities for positive change Collectively the handbook demonstrates that global development challenges are becoming increasingly complex and multi faceted and are to be found in the Global North as much as the South It draws attention to structural inequality and disadvantage alongside possibilities for positive change The Handbook will serve as a valuable resource for students and scholars across multiple disciplines including Development Studies Anthropology Geography Global Studies Indigenous and Postcolonial Studies Political Science and Urban Studies The Introduction of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Chimpanzees, War, and History R. Brian Ferguson,2023 The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that killing is instead due to human disturbance has been pronounced dead and buried In *Chimpanzees War and History* R Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill *Before Humanity* Stefan Herbrechter,2021-12-13 *Before Humanity* takes up the

question of the post in the posthuman from the position of ancestry Speculating about who or what comes after the human inevitably throws us back to our very beginnings The before in Before Humanity in this context takes on two meanings 1 what happened before we apparently became human which translates into a critical reading of paleo anthropology as well as evolutionary narratives of hominization 2 living through the end of a certain humanist anthropocentric notion of humanity what tasks lie before us which provokes a critical reading of the Anthropocene and current narratives of geologization In other words Before Humanity investigates conceptualizations of humanity and asks whether we have ever been human and if not what could or maybe what should we have been

World Without Secrets Richard Hunter, 2002-04-19 With rapid evolution and deployment of new information and computing technologies the age of ubiquitous computing is upon us Human beings will be to an ever greater extent surrounded by machines that monitor record and analyze everything that occurs around them leading to a world in which secrets are almost impossible to keep This environment will have a profound effect on businesses society and individuals This book explores the implications of the world without secrets discusses policy options and looks at the future of information crime

Planet of the Apes Ian Edginton, Paco Medina, 2001 Several decades after human astronaut Leo Davidson's adventure on the ape world ape society has been torn apart from within by a horrible civil war that's erupted between ape rebels advocating human integration and the fearful but powerful ape regime Is the ape Seneca and his scattered but loyal followers of humans and apes enough to defeat the charismatic Shiva and her imposing ape army The conflict has reached a bloody stalemate But Shiva has a deadly secret that will end the war and wipe out mankind After all the only good human is a dead human
