

Blackburne, 1997, p. 123: "Black and Shapere's (1996) book is a very welcome contribution to the philosophy of science, and in particular to the philosophy of biology."

But as things are, evolutionary developmental biology has been off to a slow start. It has been a somewhat barren field for evolutionary biologists. Other organisms have proved more tractable, and could not get around the fact that the field is still small. Perhaps the most significant part, and likely the most important, is the question of the role of the environment in the development of the organism.

In contrast, the role of the environment in the development of the organism is a topic that is much less well understood.

There is also a growing interest in the role of the environment in the development of the organism. This is a topic that is much less well understood. The role of the environment in the development of the organism is a topic that is much less well understood.
