South Africa Business and Investment Opportunities Yearbook IBP USA, 2013-08 2011 Updated Reprint Updated Annually South Africa Business and Investment Opportunities Yearbook **Introduction to Unmanned Aircraft Systems** R. Kurt Barnhart, Douglas M. Marshall, Eric Shappee, 2021-03-04 Introduction to Unmanned Aircraft Systems Third Edition surveys the basics of unmanned aircraft systems UAS from sensors controls and automation to regulations safety procedures and human factors Featuring chapters by leading experts this fully updated bestseller fills the need for an accessible and effective university textbook Focussing on the civilian applications of UAS the text begins with an historical overview of unmanned aerial vehicles and proceeds to examine each major UAS subsystem Its combination of understandable technical coverage and up to date information on policy and regulation makes the text appropriate for both Aerospace Engineering and Aviation programs *SURGE ANALYSIS AND THE WAVE PLAN METHOD* Srinivasa Lingireddy, Don J. Wood, 2021-06-14 The book describes the causes and effects of transient water hammer events in liquid filled pipes and describes how the powerful and stable Wave Plan Method WPM can be used to address transients during surge modeling The authors compare and contrast WPM with the Method of Characteristics MOC which is the other widely used surge analysis tool While MOC can be useful for many situations the larger and more complex a model becomes the more the computational efficiency of WPM is necessary to avoid longer and longer analysis times The authors also describe how WPM is more generalizable than MOC which is a term that describes a suite of tools consisting of several variants that were developed to address different modeling situations This book provides details on surge modeling in general and the use of WPM in particular This includes pressure attenuation determination of wave speeds in different pipe types and various liquid media pump and turbine characteristics curves and the effects of boundary conditions The discussion of boundary conditions includes an extensive look at the effects of the air water interface as it applies to bulk air intrusion into pipelines and as it relates to the use of air vacuum valves as surge protection The authors discuss surge protection design for different real world scenarios and how to model of a full list of surge control devices including a detailed discussion of check valves Last the book describes the assumptions and uncertainties encountered during data collection and model building and examines the potential effect of these uncertainties Where uncertainties cannot be mitigated the authors discuss ways to increase the safety factor of surge protection designs **The Spurs Alphabet** Bob Goodwin, 2017 A complete record of every player to have made a first team appearance for Tottenham Hotspur Football Club *Army of None: Autonomous Weapons and the Future of War* Paul Scharre, 2018-04-24 Winner of the 2019 William E Colby Award The book I had been waiting for I can t recommend it highly enough Bill Gates The era of autonomous weapons has arrived Today around the globe at least thirty nations have weapons that can search for and destroy enemy targets all on their own Paul Scharre a leading expert in next generation warfare describes these and other high tech weapons systems from Israel s Harpy drone to the American submarine hunting robot

ship Sea Hunter and examines the legal and ethical issues surrounding their use A smart primer to what s to come in warfare
Bruce Schneier Army of None engages military history global policy and cutting edge science to explore the implications of giving weapons the freedom to make life and death decisions A former soldier himself Scharre argues that we must embrace technology where it can make war more precise and humane but when the choice is life or death there is no replacement for the human heart

Space Warfare John J. Klein,2024-09-18 This book examines military space strategy within the context of the land and naval strategies of the past This second edition has been updated and revised with several new chapters included The book examines competition and conflict in the space domain including the methods used and sound counterstrategies to thwart a competitor s efforts Contrary to many spacepower pundits the book explains that neither is the space domain inherently offense dominant nor is there a first mover advantage when incorporating a sound space strategy Offering new insights into the nature of strategic competition in space this second edition leans heavily on the British maritime experience and the work of Julian Corbett to provide a strategic framework for understanding competition crisis and conflict in the space domain It also includes important concepts from leading theorists and strategists both past and present to amplify concepts and provide additional insights into the functioning of space strategy The book provides a foundational framework by underscoring that space strategy is shaped by the fundamental nature of all warfare along with the universal principles of strategy and the essential unity of all strategic experience Warfare is warfare no matter the domain of operations and consequently policymakers and military leaders can look to historical experience and knowledge of past strategic frameworks to help gain insights into the functioning of space warfare This book will appeal to students of spacepower defense and strategic studies and International Relations

[The Politics of Crises - The Crisis of Politics in Central and Eastern Europe](#) Fanni Tanács-Mandák,Csaba Erdős,2025-08-18 The field of political science has been

significantly shaped by the crises of the last decade particularly in Central and Eastern Europe The migration crisis of 2014 2015 the COVID 19 pandemic of 2020 2021 and the ongoing conflict between Russia and Ukraine have each posed unique challenges to nation states altering the dynamics of political institutions and actors These crises have highlighted the varying responses of European national governments from the welcoming Willkommenskultur to the construction of border fences during the migration crisis to the diverse legal frameworks adopted during the pandemic The escalation of the Russian Ukrainian conflict has further complicated these dynamics prompting different governmental responses Despite these varied approaches a common thread is the necessity for political institutions to interpret and respond to crises often requiring a departure from traditional decision making processes Current research has begun to explore these responses yet there remains a gap in understanding the full impact of these crises on inter institutional relations and the recalibration of policy making within political systems

The Chemist and Druggist ,1918 **Governing Law and Dispute Resolution in the Oil and Gas Industry** Pereira, Eduardo G.,Timonen, Tuuli,Aleynikova, Elina,2022-08-23

The oil and gas industry's wide international exposure and constantly changing landscape leave it particularly vulnerable to disputes. As this practical book demonstrates, the risks associated with disputes can be mitigated by parties utilising governing law and dispute resolution clauses in contractual agreements within the sector. Examining a global range of jurisdictions, the book offers clear guidance on the most appropriate choice of law and choice of dispute resolution forum for oil and gas contracts, analysing the key issues and defining the legal contours involved. *The Parliamentary Debates (official Report)*. Hayes' Principles and Methods of Toxicology A. Wallace Hayes, Tetyana Kobets, 2023-07-03 Hayes' Principles and Methods of Toxicology has long been established as a reliable and informative reference for the concepts, methodologies and assessments integral to toxicology. The new edition contains updated and new chapters with the addition of new authors while maintaining the same high standards that have made this book a benchmark resource in the field. Key Features: The comprehensive yet concise coverage of various aspects of fundamental and applied toxicology makes this book a valuable resource for educators, students and professionals. Questions provided at the end of each chapter allow readers to test their knowledge and understanding of the material covered. All chapters have been updated and over 60 new authors have been added to reflect the dynamic nature of toxicological sciences. New topics in this edition include: Safety Assessment of Cosmetics and Personal Care Products; The Importance of the Dose-Response; Novel Approaches and Alternative Models; Epigenetic Toxicology; and an Expanded Glossary. The volume is divided into 4 major sections addressing fundamental principles of toxicology: Section I Principles of Toxicology; major classes of established chemical hazards; Section II Agents; current methods used for the assessment of various endpoints indicative of chemical toxicity; Section III Methods as well as toxicology of specific target systems and organs; Section IV Organ and System Specific Toxicology. This volume will be a valuable tool for the audience that wishes to broaden their understanding of hazards and mechanisms of toxicity and to stay on top of the emerging methods and concepts of the rapidly advancing field of toxicology and risk assessment.
