both historical and contemporary language mixing practices in a large range of language pairs and multilingual communities. The research collected here explores diverse approaches including corpus linguistics, Critical Discourse Analysis, literacy studies, ethnography and analyses of the visual/textual aspects of written data. Each chapter based on empirical research of multilingual writing presents methodological approaches as models for other researchers. New perspectives developed in this book include analysis specific to written rather than spoken discourse approaches from the new literacy studies treating mixed language literacy from a practice perspective, a focus on both traditional and new media types and the semiotics of both text and the visual environment.
