Sociology for Music Teachers Richard Colwell,Hildegard Froehlich,2015-07-02 For upper level undergraduate and introductory graduate and doctoral courses in music education Outlining the basic aspects constructs and concepts relevant to understanding music teaching and learning from a sociological perspective this volume introduces students to the discipline as a tool in understanding their own work The text shows how certain academics in music sociology and education have thought about the relationship of music to education schooling and society and examines the consequences of such thinking for making instructional choices in teaching methods and repertoire selection School music teaching is imbedded in two major societal traditions 1 the tradition of music making listening and responding and 2 the tradition of education as a societal mandate The first tradition holds firmly to music artistry and musicological scholarship the latter of which includes

music sociology The second tradition that of education as a field of study relies mostly on pedagogical principles rooted equally in psychology and sociology Hildegard Froehlich bases the book upon the premise that a music teacher's work is equally shaped by both traditions The more music teachers become aware of how societal structures shape their own lives as well as the lives of their students colleagues and superiors the more reality based their teaching will become Society is a composite of communities in which different social classes groups and reference groups co exist to varying degrees of compatibility due to real or perceived differences in norms and values as well as hierarchies of power Informed or intuitive choices made by an individual indicate allegiances to particular groups how those groups are structured hierarchically and where and how each individual fits into those hierarchies This is true for the music world as it is true for the world of education

Modernist Travel Writing David G. Farley, 2010-11-30 As the study of travel writing has grown in recent years scholars have largely ignored the literature of modernist writers Modernist Travel Writing Intellectuals Abroad by David Farley addresses this gap by examining the ways in which a number of writers employed the techniques and stylistic innovations of modernism in their travel narratives to variously engage the political social and cultural milieu of the years between the world wars Modernist Travel Writing argues that the travel book is a crucial genre for understanding the development of modernism in the years between the wars despite the established view that travel writing during the interwar period was largely an escapist genre one in which writers hearkened back to the realism of nineteenth century literature in order to avoid interwar anxiety Farley analyzes works that exist on the margins of modernism generically and geographically works that have yet to receive the critical attention they deserve partly due to their classification as travel narratives and partly because of their complex modernist styles The book begins by examining the ways that travel and the emergent travel regulations in the wake of the First World War helped shape Ezra Pound's Cantos From there it goes on to examine E E Cummings's frustrated attempts to navigate the unworld of Soviet Russia in his book Eimi Wyndham Lewis's satiric journey through colonial Morocco in Filibusters in Barbary and Rebecca West's urgent efforts to make sense of the fractious Balkan states in Black Lamb and Grey Falcon These modernist writers traveled to countries that experienced most directly the tumult of revolution the effects of empire and the upheaval of war during the years between World War I and World War II Farley's study focuses on the question of what constitutes evidence for Pound Lewis Cummings and West as they establish their authority as eyewitnesses translate what they see for an audience back home and attempt to make sense of a transformed and transforming modern world Modernist Travel Writing makes an original contribution to the study of literary modernism while taking a distinctive look at a unique subset within the growing field of travel writing studies David Farley's work will be of interest to students and teachers in both of these fields as well as to early twentieth century literary historians and general enthusiasts of modernist studies
