## B) General principles of biological classification (chapter 14)

List the seven levels of classification, in order from general to specific:

Name two problems addressed when a group seems to fit “between” categories?

Compare and contrast taxonomy and systematics.

Describe the science of cladistics. What is a cladogram?

Explain what is meant by a primitive character state and a derived character state.

Species A and B are more closely related to each other than either is to C, D, E, or F. Species C and D share a common ancestor not shared by either A, E and F also share a common ancestor not shared by either A, C, D, E, and F share a common ancestor separate from A and B. Draw a cladogram for these 6 species.
