Do You Believe In Magic? (A Wild Thing Book) Laura Krantz, 2024-10-08 Inspired by her popular Wild Thing podcast journalist Laura Krantz incorporates the scientific method and her journalistic skills to determine if magic might be real in *Do You Believe in Magic*. Magic spells and curses, hexes and potions, superstition and rituals. We've all heard stories of alchemists attempting to turn abundant lead into precious rare gold. Or of poor unfortunate souls asking potion masters to brew up unappetizing concoctions that will help them find love. And of course we're familiar with curses muttering magical words for the purposes of exacting revenge on an enemy or protecting a hidden treasure. Who wouldn't like the idea of special powers or control over the natural world? It seems pretty fun even if it's just the stuff of fantasy books and movies. But a lot of what we call magic has grounding in real practices. In fact, magic is at the root of many scientific fields from chemistry to botany to astronomy and has been an important part of human culture for thousands of years. *Do You Believe in Magic* takes readers through a world where magic and science collide. What do they have in common? Where do they differ? What role has magic played in our history and the history of science? Why is magic still significant even when it doesn't seem to line up with reality? And is it possible to be scientifically minded and still believe in magic? Readers are encouraged to weigh the facts and go beyond their gut assumptions to stretch their imaginations and think about why magic and science might be two sides of the same coin. Includes color illustrations, an at-home science magic experiment, glossary, bibliography, and index. *A Wild Thing* series: *The Search for Sasquatch*, *Is There Anybody Out There?*, *Do You Believe in Magic*. **Growth and Changes in Plants** Jennifer Lawson, 2001 The 14 lessons in this module introduce students to the parts of a plant, types of plants, plant life cycles, the needs of plants for survival, and how plants are affected by seasonal changes and human behaviour. Also included: materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets, and visuals. The module offers a detailed introduction to the Hands On Science program, guiding principles, implementation guidelines, an overview of the skills that young students use and develop during scientific inquiry, a list of children's books and websites related to the science topics introduced, and a classroom assessment plan with record-keeping templates. **Hands-On Science and Technology for Ontario, Grade 3** Jennifer E.
