Russell, 2019-10-16 Originally published in 1994 The Earth Humanity and God discusses the relationship between science and religion The book discusses the condition of the earth as it was at the time of publication and the future prospects of the planet arguing that neither the conventional mechanistic view nor New Age philosophy helps alone in evaluating our relationship with the Earth The book examines methods of combatting the threats to the Earth exploring both a scientific and non scientific stance investigating the uncontrolled expansion of technology as well as empirical pre scientific mysticism The book also explores the resurgence in ancient ideas of Mother Earth as a dangerous piece of romantic irrationality and suggests that these views pose a danger to religious scientific examinations The book suggests instead a hard headed attempt to relate Biblical and scientific data and that this in turn can yield a valuable new understanding of the problems facing the world A dictionary of chemistry and the allied branches of other sciences Henry Watts (F.C.S.), 1879 University of Chattanooga Bulletin University of Chattanooga, 1915 *A dictionary of chemistry.
