

# Using Activated Economic Analysis

Activated Economic Analysis makes it easy to access key results from [Integrated Cost Estimation](#).

## Dashboard Panel

Initially, the Economics button appears in the Activation dashboard without results and turned off:

The screenshot shows a green rectangular panel titled "Economics". It contains two columns of information. The left column is labeled "Capital Cost" and shows "USD". The right column is labeled "Utility Cost" and shows "USD/Year". At the bottom right of the panel is a toggle switch that is currently in the "off" position, indicated by a grey circle and the word "off".

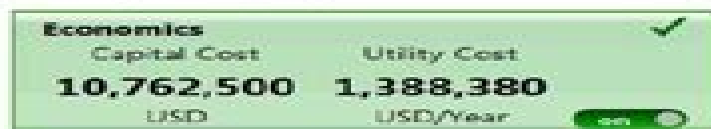

Before you begin to use the dashboard panel, use the [Costing Options](#) form to specify the costing template, scenario name and description, and optionally the operating life of the plant, length of plant startup, and the date for the start of basic engineering. In order to get raw material results, specify stream prices as well, and configure your model to use [utilities](#). For more details on this configuration, see [Integrated Cost Estimation](#).

**Note:** When Aspen Plus is running invisibly (such as from automation or from Aspen Simulation Workbook), you must make the simulation visible in order to fully initialize components needed to run activated economics. Once you have done so it should work if you subsequently make it invisible.

Run the simulation. After your run is complete, in the Economics panel on the [Activation dashboard](#), click **off** to turn the on activated economics and perform cost analysis.

**Note:** If there are input changes since the last run, you must re-run. If you try to use Activated Economic Analysis when there are changes since the last results, you will be asked whether to re-run the simulation or cancel the action.

When you do so, Aspen Process Economic Analyzer calculates costs and shows them in the panel:

The screenshot shows the same green rectangular panel as before, but now it displays numerical results. The "Capital Cost" is "10,762,500 USD" and the "Utility Cost" is "1,388,380 USD/Year". A green checkmark icon is visible in the top right corner of the panel. The toggle switch at the bottom right is now in the "on" position, indicated by a green circle and the word "on".

If there are warnings from economic analysis, such as some unit operations whose costs could not be calculated, a yellow warning icon ⚠ will appear on this panel. Click it to open the **Equipment** tab of the Equipment/Economics form; information about the warnings appears in the **Evaluation Errors** column at the far right of this screen. This area can also display ⛔ when economics is not available, a green check mark (as above) when results are available, and a status message when economics is calculating.

## Equipment/Economics Form

Detailed economic results appear in the [Equipment/Economics](#) form. Click the capital cost result on the dashboard panel to see a summary of the costs. Click the utility cost result to see details of the utility costs. You can click the other tabs on the Equipment/Economics form to see information about specific types of equipment.
