Contemporary Robotics Aleksandar Rodic, 2009-12-01 This book is a collection of 18 chapters written by internationally recognized experts and well known professionals of the field. Chapters contribute to diverse facets of contemporary robotics and autonomous systems. The volume is organized in four thematic parts according to the main subjects regarding the recent advances in the contemporary robotics. The first thematic topics of the book are devoted to the theoretical issues. This includes development of algorithms for automatic trajectory generation using redundancy resolution scheme, intelligent algorithms for robotic grasping, modelling approach for reactive mode handling of flexible manufacturing and design of an advanced controller for robot manipulators. The second part of the book deals with different aspects of robot calibration and sensing. This includes a geometric and threshold calibration of a multiple robotic line vision system, robot based inline 2D/3D quality monitoring using picture giving and laser triangulation and a study on prospective polymer composite materials for flexible tactile sensors. The third part addresses issues of mobile robots and multi agent systems including SLAM of mobile robots based on fusion of odometry and visual data, configuration of a localization system by a team of mobile robots, development of generic real time motion controller for differential mobile robots, control of fuel cells of mobile robots, modelling of omni directional wheeled based robots, building of hunter hybrid tracking environment as well as design of a cooperative control in distributed population based multi agent approach. The fourth part presents recent approaches and results in humanoid and bioinspirative robotics. It deals with design of adaptive control of anthropomorphic biped gait, building of dynamic based simulation for humanoid robot walking, building controller for perceptual motor control dynamics of humans and biomimetic approach to control mechatronic structure using smart materials.
