A must have resource. Andrea Honigsfeld EdD Molloy College. Language is critical to the development of content learning as students delve more deeply into specific disciplines. When students possess strong academic language they are better able to critically analyze and synthesize complex ideas and abstract concepts. The Second Edition of *Building Academic Language* includes new strategies for addressing specific Common Core standards and also provides answers to the most important questions across various content areas including: What is academic language and how does it differ by content area? How can language building activities support content understanding for students? How can teachers assist students in using language more effectively especially in the academic context? How can academic language usage be modeled routinely in the classroom? How can lesson planning and assessment support academic language development?
