painters and garden designers Ray Desmond,2020-12-23 Over the past four centuries botanists and gardeners in the British Isles have gathered maintained and propagated many varying species of plants Their work has been documented in innumerable books and articles which are often difficult to trace The Dictionary of British and Irish Botanists and Horticulturalists represents a time saving reference source for those who wish to discover more about the lives and achievements of the horticulturalists listed The dictionary s utility comes not only from indicating the major publications of the named authors but also the location of their herbaria and manuscripts The previous 1977 edition of the Dictionary has for many years been a much used source of information for botanists botanic artists and archivists In this revised edition the scope has been expanded to include among its 13 000 entries flower painters in addition to botanical artists over 1400 entries and for the first time garden designers Finally the Dictionary should have international appeal since so many botanists and gardeners worked on collective plants overseas in particular in North America and the British Commonwealth Each entry gives wherever possible details of dates and places of birth and death educational qualifications professional posts honours and awards publications location of plant collections manuscripts drawings and portraits Its main function however is to provide further biographical references to books and periodicals Comprehensive classified indices facilitate access by professions and activities countries and plant interests *Rocks in Motion* Pawe? L. Polkowski,2024-08-31 First fully illustrated presentation of a large but generally little known assemblage of petroglyphic rock art from the Western Desert of Egypt Rock art in Dakhleh was produced for perhaps as long as 10 millennia resulting in the formation of hundreds of sites displaying thousands of images In some places petroglyphs form a true melting pot of iconographic creations elsewhere only isolated depictions appear on rock surfaces Various rock art traditions from prehistoric through pharaonic Graeco Roman and mediaeval have all added to a tremendous variety of petroglyphs their formal traits and subject matter This book is the first ever monograph on Dakhleh Oasis rock art providing both an introduction to the versatile topic as well as an overview of the current state of research It is designed as a collection of essays that deal with specific aspects of the research The reader is offered here not only old and new documentation much of it previously unpublished but also a great deal of innovative interpretation All chapters although devoted to different case studies revolve around an all encompassing concept of landscape of motion It is argued here that rock art regardless of its date of origin was and is always involved in certain dynamic contexts In Dakhleh the majority of petroglyphs especially during historical periods were produced in spatial

contexts of paths and routes and thus by people on the move It is argued here that various kinds of movement were often a significant factor contributing to the meaning and function of the images The intention of this book is to explore and unveil such contexts which may prove somewhat elusive if we focus our analyses exclusively on the representational aspects of rock art Such a type of integration of rock art landscape and motion is the major aim of this work and has hopefully been achieved by merging perspectives and concepts derived from Egyptology Anthropology and other social sciences **Billboard**
