**Trane® unitary rooftop systems** are designed to meet commercial building comfort needs and provide building owners with superior indoor air quality, straightforward installation and minimized energy consumption. Dedicated digital controls enable the use of building management systems to allow for efficient operation and system monitoring to ensure performance.

Trane rooftop units with eFlex™ technology combine innovation with reliability and performance to provide building owners with the efficiency they need to reduce utility bills while keeping occupants comfortable. By precisely matching output to the cooling demands of the space, Trane eFlex compressors and fans operate at their fastest levels when demand is high, and modulate to slower levels when demand is lower, for an ultra-high energy efficiency ratio (EER, which measures efficiency at peak output) and integrated energy efficiency ratio (IEER, a measurement of efficiency at variable workloads).
