Martha Bayne, 2011-11-08 *The Soup and Bread Cookbook* aims to explore the social role of soup through a collection of terrific, affordable recipes from food activists, chefs and others. This quirky exploration of the cultural history of soup as a tool for both building community and fostering social justice is the result of a brainstorm: eating your way through a pot of soup day after day can get boring; why not get together and swap some with friends? Now neighbors across the country are getting together regularly for home based soup swaps. In Chicago, the arts collective InCUBATE uses soup as a microfunding tool. And of course, soup can be a political statement: the radical volunteers of Food Not Bombs have been providing free vegetarian soup to the hungry as a protest against war and social injustice since 1980. These are just a few examples of the stories Bayne wraps around a collection of delicious, accessible and tested soup recipes. *Information Architecture* Christina

Wodtke, Austin Govella, 2009-01-22 *Information Architecture Blueprints for the Web* Second Edition introduces the core concepts of information architecture: organizing web site content so that it can be found; designing website interaction so that it's pleasant to use; and creating an interface that is easy to understand. This book helps designers, project managers, programmers and other information architecture practitioners avoid costly mistakes by teaching the skills of information architecture swiftly and clearly.
