Cellular Manufacturing** Nallan C. Suresh,John M. Kay,2012-12-06 Group Technology and Cellular Manufacturing GT CM  
have been widely researched areas in the past 15 years and much progress has been made in all branches of GT CM  
Resulting from this research activity has been a proliferation of techniques for part machine grouping engineering data bases  
expert system based design methods for identifying part families new analytical and simulation tools for evaluating  
performance of cells new types of cell incorporating robotics and flexible automation team based approaches for organizing  
the work force and much more however the field lacks a careful compilation of this research and its outcomes The editors of  
this book have commissioned leading researchers and implementers to prepare specific treatments of topics for their special  
areas of expertise in this broad based philosophy of manufacturing The editors have sought to be global both in coverage of  
topic matters and contributors Group Technology and Cellular Manufacturing addresses the needs and interests of three  
groups of individuals in the manufacturing field academic researchers industry practitioners and students 1 The book  
provides an up to date perspective incorporating the advances made in GT CM during the past 15 years As a natural  
extension to this research it synthesizes the latest industry practices and outcomes to guide research to greater real world  
relevance 2 The book makes clear the foundations of GT CM from the core elements of new developments which are aimed at  
reducing developmental and manufacturing lead times costs and at improving business quality and performance 3 Finally the  
book can be used as a textbook for graduate students in engineering and management for studying the field of Group
