**Executive Functions in Psychiatric Disorders** Leandro Fernandes Malloy-Diniz,Débora Marques de Miranda,Rodrigo Grassi-Oliveira,2017-10-17 Executive Functions comprise a range of neuropsychological processes related to intentional behavior and cognitive control There are several theoretical models defining and explaining the concept of Executive Functions Most of these models consider that the term Executive Functions encompasses cognitive process as working memory cognitive flexibility inhibitory control and other complex functions as planning problem solving and abstract reasoning Other models argue that motivational and emotional functions such as affective decision making reside under the concept of Executive Function Much evidence supports how complex cognitive functions are related to the physiological activity of brain networks including the frontal cortex and its connections with subcortical structures Several psychiatric disorders related to impairment in these brain networks eg bipolar disorder schizophrenia ADHD obsessive compulsive disorder and drug addiction leading to deficits in Executive Functions These cognitive deficits affect patients everyday functioning worsening the clinical course of the disease For example deficits in Executive Functions are related to suicide behavior in bipolar disorder patients Furthermore these deficits also relate to obesity a lack of adherence to treatment and an underperformance in the workplace and educational settings The understanding of the role of deficits in Executive Functions including its neurobiological basis developmental trajectories and relationship with clinical outcomes is fundamental to improve clinical management of psychiatric patients This research topic includes 13 articles with interdisciplinary contributions related to the understanding of the deficits in Executive Functions and its relationship with clinical manifestations in psychiatric disorders      **Philosophising the Dialogos Way towards Wisdom in Education** Guro Hansen Helskog,2019-03-05 Philosophising the Dialogos Way towards Wisdom in Education proposes the innovative and holistic Dialogos approach to practical philosophy as a way of facilitating wisdom oriented pedagogy The book encourages individual and collective development through dialectical interplays between personal life philosophical concepts and subject matter Based on two decades of the author s reflective pedagogical practice research this book develops a

philosophy of dialogical relationships It analyses approaches to philosophical practice and suggests facilitation moves and philosophical exercises that can be adapted across educational levels school subjects and higher education disciplines Chapters provide examples of transformative philosophical group dialogues and suggest pathways towards multi perspective thinking mutual understanding and wisdom in culturally diverse contexts Philosophising the Dialogos Way towards Wisdom in Education can be used as a holistic approach to democracy education peace education education for sustainable living and wellbeing The book will be of great interest to academics researchers and students in the fields of teacher education philosophy of education and higher education It will also appeal to practising professionals such as teachers and teacher educators in secondary and higher education

**Reflexivity and Psychology** Giuseppina Marsico,Ruggero Andrisano Ruggieri,Sergio Salvatore,2015-11-01 Reflexivity is a category that is too appealing not to arouse interest It is a concept largely diffused in several psychological domains as well as associated with epistemological theoretical methodological and practical discussions At the same time it is a very polysemic notion understood and used in many different ways If one approaches the notion and tries to identify the semantic boundaries of its usage the seeming solidity of the term fades away and a rather liquid semantic field emerges a field where several interpretations coexist being contingent to the context of the discussion in which they are implemented This is the reason that makes the notion of reflexivity a prototypical example of the difficulties encountered by Psychology and more in general social sciences in the effort to define their own language The term reflexivity like many others the language of Psychology is full of is used in daily life and thus its semantics is shaped by the pragmatic contingent functions it serves in such communicational circumstances The apparent from afar clearness of the concept does not concern its conceptual epistemic status but the capacity of the sign to contribute efficaciously to mediate and regulate the exchange The theoretical elaboration of the notion of reflexivity can be seen as one of the ways of performing the challenging task of developing an intentional language for Psychology By working on such a notion one can realize that common sense lies at the core of psychological science and what it means to separate the former from the latter so as to pursue the foundational task of developing Psychology as a theory driven science
