Battersby, Charles W. Grimes, 2012-12-01

Knowing the going royalty rate for virtually any product is as simple as reaching for the newly published Licensing Royalty Rates 2013 Edition. This information-packed report details the royalty rates for over 1,500 products and services in ten lucrative licensed product categories: art, celebrity, character, and entertainment, collegiate, corporate, designer, event, sports, nonprofit, and music. Setting a royalty rate too high can scare away potential licensees, while accepting a lower rate can cost licensors hundreds of thousands of dollars. Licensing Royalty Rates 2013 Edition provides all the information you need to calculate the right rate every time. The data in Licensing Royalty Rates is compiled using information from the U.S. Patent and Trademark Office. After careful review by a blue ribbon panel of expert licensing consultants uniquely qualified to know what the appropriate rate range is for specific properties in each licensing category, the information is organized into four time-saving sections that give researchers fast access to comprehensive statistical and analytical data. Royalty rate listing alphabetically by licensed product provides a detailed alphabetical listing of products and their suggested rate range across all product categories. Royalty rate listing by international trademark class lets you quickly identify subtle royalty rate differences between similar products within specific international trademark classes. Checklist of licensed products and services offers a quick reference to products with a high potential for licensing. Comprehensive list of licensed products and services presents a detailed list of all surveyed products and services within a trademark class for preparing intent to use trademark applications. This detailed information gives both beginning and more experienced licensing professionals the confidence needed to negotiate the maximum allowable rate regardless of the product, the market, and the parameters of the specific deal itself.

New Trends in Internet Market Jose Manuel Garcia Sanchez, 2007-06-04 Inhaltsangabe Abstract Internet Broadband access Mobile telephony Fixed telephony TV Google Yahoo Social networks Mobile network operators Telecommunication operators Media conglomerates Citizen media All these terms have always been traditionally considered independent, but nowadays the interrelations among all of them happen more often and are becoming deeper. A new global scenario is being defined in which communications, entertainment, and information are converging, being provided by global conglomerates in our PCs, TVs, and mobile devices. Nowadays, technology advances will soon enable to provide users with the best internet experience on the go. Services hosts, access providers, vendors, media owners, and online players now realize that the barriers that traditionally have separated their markets dilute, bringing them all in a common global market. Internet business models have now to converge with traditional structures, and merges and acquisitions happen to reach competitive positions in foreign markets. The paradigm of internet will influence and change the most popular services as they are currently known. Fixed communication providers already suffer a loss of voice revenues in favor of the cheapest online communication. Mobile operators are facing now the same situations and find themselves on a delicate strategic situation with VoIP nearing a competitive QoS. Voice alone doesn't seem to be for a long time enough as a unique revenue source. Even watching TV will be soon an enriched, personalized experience through the new IP end2end platforms. Will the online players

be the ones successfully accomplishing a vertical expansion of their business How will the mobile operators react Which will be the paper of the network access providers What about the media and content How will all that affect the customers In this document will be described the nowadays situation on the different markets involved in the converging scenario and how the respective players situate themselves strategically An initial global point of view will be followed by the definition of strategies and trends of each of them independently and the determination of the merging points and relations among them The effort will be focus firstly on offering recommendations and comparisons concerning specific environments Step by step the basis of the competition environment in the converging market will be defined offering a strategic map of the
