The channels through which this interaction takes place are many and are aimed at optimizing teaching methodology. Researchers and scholars, research centres, and the places of higher learning themselves are increasingly aware of the growing importance of universities, which, thanks to their intrinsic ability to renew themselves, have taken on a vital, central, and propulsive role. Communication develops as a result of free exchange, debate of the materials available, and the study of the various references and analysis sources. With the advent

of information systems the teaching methodology has assumed a decisive role both in terms of the quantity of data available and the quality of the information Distance learning is a new and important opportunity for the immediate future The Anaesthesia and Critical Care School of Trieste has promoted this interesting and highly relevant initiative by drawing together teaching material from the academic year 2003 2004 Numerous international lecturers have contributed to this valuable achievement In addition a large part of the material is the fruit of a real consortium between the various Italian Schools of Anaesthesia
