Alberta John Church,Neale Smith,2022-03-01 Alberta A Health System Profile provides the first detailed description of

Alberta's health care system and the underpinning political and social forces that have shaped it. Drawing on significant wealth from government revenues generated through the energy sector, Alberta has been able to develop an extensive public health and health care infrastructure. Alberta has used its financial resources to attract health professionals by offering the highest levels of financial compensation in Canada. However, although it spends more per capita than other Canadian jurisdictions, Alberta's health care system costs and health outcomes are mediocre compared to those of many other Canadian jurisdictions. This unexpected outcome is the consequence of the unique interplay of economic and political forces within Alberta's political economy. Through an examination of Alberta's political and economic history and using research on the structures and services provided, Alberta A Health System Profile provides a detailed description of the programs and services that constitute Alberta's health care system.

Proceedings of the 1st International Conference for Health Research - BRIN (ICHR 2022) Ika Nurlaila, YuneFit Ulfa, Hayani Anastasia, Gurendro Putro, Rika Rachmalina, Rozana Ika Agustiya, Novaria Sari Dewi Panjaitan, Rosantia Sarassari, Anna Lystia Poetranto, Sela Septima Mariya, 2023-10-23. This is an open access book. The National Research and Innovation Agency (Acronymized in Bahasa as BRIN: Badan Riset and Inovasi Nasional) of the Republic of Indonesia was launched in 2021 and has been the only one of Indonesia's authorized research institutions since. The Agency embodies throughout department and non-department research bodies in Indonesia and answers and thus responsible directly to the President of Indonesia. Despite its juvenile age, BRIN is in a tight competition with urgencies of untangling unresolved issues in various aspects in collective life as a nation and a state spanning socioeconomic and culture to medicine and its translational derivatives. To function as effectively as expected, BRIN has launched 12 research organizations, each accountable for a specific research field as reflected by the expertise of the pertinent researchers. Among those, Research Organization for Health was established as an answer to the major challenge of overcoming national burdens which are holistically captured as the roadmaps of SDGs in Indonesia, where Health stands specially as the top three priority and regarded as Good Health Wellbeing. It is clear that what have been produced through long chain of processes in the research chambers must be driven forward and translated accordingly to reach downstream utilizations in such a way that the good health and well-being are reachable in any levels. As to manifesting these goals into realization, knowledge sharing is deemed to be a plausible vehicle. This enables disseminations of most current research projects related to health across research institutions regionally or globally. Therefore, we see the need to organize our very first international conference that is further set as one of our annual events with contemporary umbrella themes. We welcome researchers, scholars, and practitioners in health and health-related fields to share their insightful research results in our conference. The general objective of BRIN's 1st International Conference for Health (ICHR) is to facilitate dissemination and exchange of most recent progresses made across research institutions and to promote prospectus multi-nationals and/or multi-institutional collaborations to achieve the good health and well-being.
