Physical Science Caps March 2014 Paper Grade 1:

Report Series: Committee on Astronomy and Astrophysics National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Space Studies Board, Committee on Astronomy and Astrophysics, 2017-06-08 The 2010 astronomy and astrophysics decadal survey New Worlds New Horizons in Astronomy and Astrophysics laid out an exciting portfolio of recommended activities to guide the agencies research programs over the period 2012–2021. The newly constituted Committee on Astronomy and Astrophysics (CAA) is tasked with monitoring the progress of the survey's recommended priorities. The CAA met in conjunction with Space Science Week 2017 in Washington, D.C., on March 28–30, 2017. This was the first meeting at which the CAA could produce a report and in advance of that meeting the CAA received a question from NASA about an upcoming Small Explorer (SMEX) mission call. This report addresses whether there may or may not be sufficient compelling science motivations for a SMEX-sized mission to justify a SMEX Announcement of Opportunity (AO) in 2018 or 2019 as is currently planned.

Se acabó el promedio Todd Rose, 2017-01-24

Combinando la ciencia y la historia con sus propias experiencias Rose trae a la vida la historia sin narrar de cómo llegamos a aceptar la idea científicamente equivocada de que se pueden usar los promedios para entender a las personas y ofrece una poderosa alternativa: los tres principios de individualidad. Estos están encima del promedio: Es tu hijo un estudiante de primer nivel. Es tu empleado una persona introvertida o extrovertida. Todos los demás te mide.

con la vara de los promedios se nos juzga por lo cercanos o lejanos que estamos a ella La suposición de que una medida que nos compara con el promedio como los escalones en el desarrollo las pruebas de personalidad los resultados estandarizados de exámenes y las evaluaciones de desempeño revela algo significativo en cuanto a nuestro potencial se encuentra tan grabado en nuestra conciencia que pocas veces lo cuestionamos Todd Rose nos dice que esa suposición es espectacular y científicamente errónea En este libro Rose demuestra que nadie es promedio Pero aunque sabemos que los seres humanos aprendemos y nos desarrollamos de maneras distintas estos patrones exclusivos de conducta se pierden en nuestras escuelas y empresas que han sido diseñadas alrededor de esa misma persona promedio Durante más de un siglo este modelo ha pasado por alto nuestra individualidad y ha sido incapaz de reconocer el talento Ha llegado la hora de cambiar esa situación Combinando la ciencia y la historia con sus propias experiencias Rose trae a la vida la historia sin narrar de cómo llegamos a aceptar la idea científicamente equivocada de que se pueden usar los promedios para entender a las personas y ofrece una poderosa alternativa los tres principios de individualidad El principio de la irregularidad el talento nunca es unidimensional el principio del contexto los rasgos son un mito y el principio de las sendas todos andamos por el camino menos recorrido nos ayudan a comprender nuestra verdadera exclusividad y la de los demás y cómo aprovechar al máximo nuestra individualidad para tener una ventaja en la vida Are you above average Is your child an A or a C student Is your employee an introvert or an extrovert Every day we are measured against the yardstick of averages judged according to how closely we resemble it or how far we deviate from it The assumption that metrics comparing us to an average like development milestones GPAs personality assessments standardized test results and performance review ratings reveal something meaningful about our potential is so ingrained in our consciousness that we rarely question it That assumption says Harvard's Todd Rose is spectacularly and scientifically wrong In The End of Average Rose shows that no one is average Not you Not your kids Not your employees or students This isn't hollow sloganeering it's a mathematical fact with enormous practical consequences But while we know people learn and develop in distinctive ways these unique patterns of behaviors are lost in our schools and businesses which have been designed around the mythical average person For more than a century this average size fits all model has ignored our individuality and failed at recognizing talent It's time to change that
