Corporate Power and Human Rights Manette Kaisershot, Nicholas Connolly, 2018-02-02 There is ample evidence about the negative effects business activity of all types can have on the provision of human rights Equally there can be little doubt economic development usually driven through business activity and trade is necessary for any state to provide the institutions and infrastructure necessary to secure and provide human rights for their citizens The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie s Guiding Principles Yet voluntary approaches are evidently failing to prevent human rights violations and there are few alternatives in law for affected communities to seek justice This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business and human rights and its discourse This book was previously published as a special issue of the International Journal of Human Rights

The Conflicted Superpower Andrew Kennedy, 2018-05-22 For decades leadership in technological innovation has sustained U S power worldwide Today however processes that undergird innovation increasingly transcend national borders Cross border flows of brainpower have reached unprecedented heights while multinationals invest more and more in high tech facilities abroad In this new world U S technological leadership increasingly involves collaboration with other countries China and India have emerged as particularly prominent partners most notably as suppliers of intellectual talent to the United States In *The Conflicted Superpower* Andrew Kennedy explores how the world s most powerful country approaches its growing collaboration with these two rising powers Whereas China and India have embraced global innovation policy in the United States is conflicted Kennedy explains why through in depth

case studies of U S policies toward skilled immigration foreign students and offshoring These make clear that U S policy is more erratic than strategic the outcome of domestic battles between competing interests Pressing for openness is the high tech community the technology firms and research universities that embody U S technological leadership Yet these pro globalization forces can face resistance from a range of other interests including labor and anti immigration groups and the nature of this resistance powerfully shapes just how open national policy is Kennedy concludes by asking whether U S policies are accelerating or slowing American decline and considering the prospects for U S policy making in years to come
