interdisciplinary volume that restores Africa's image using a multidisciplinary lens. It incorporates disciplines such as sociology, education, global studies, economics, development studies, political science, and philosophy to explore and theorise Africa's reality in the global space and to deconstruct the misperceptions and narratives that often infantilise Africa's internal and international relations. The contributions to this volume are a hybrid of both outsider and insider perspectives that create a balanced critical discourse that can provide standard paradigms that can adequately explain, predict, or prevent Africa's current misperceptions and myths about the African crisis and failure status. The authors provide a holistic and perhaps anticolonial and anti-hegemonic perspective that can benefit a wide spectrum of academics, scholars, students, development agents, policy makers in both governmental and non-governmental organisations, and engage some alternative analyses and possibilities for socio-political and economic advancement in Africa. The book provides up-to-date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa. The book is brilliant. *Remapping Africa in the Global Space: Propositions for Change* explores Africa from the perspective of academics specialised in subject matters pertaining to the continent. In this age of globalisation, I find this book invaluable. It is a good read as it dissects, analyses, and presents issues affecting the continent in an articulate and cogent way. I highly recommend its use in academic institutions. Magnus Mfoafo MCarthy, Assistant Professor, Lyle S. Hallman Faculty of Social Work, Fellow of Tshepo Institute for the Study of Contemporary Africa, Wilfrid Laurier University, Kitchener, Canada. More than anything else, *Remapping Africa in the Global Space: Propositions for Change* speaks to the complex, multifaceted, and interfused character of the development challenges and prospects of Africa. Indeed, few books have examined contemporary Africa as comprehensively and insightfully as this edited volume. It is widely welcomed in the African academic, scholarly, and research arena. Joseph Mensah, Professor of Geography, York University, Toronto.

Science Education and Curriculum in South Africa Oscar Koopman, 2016-11-01. This book explores the impact of the socio-historical, political, and economic environment in South Africa, both during and after Apartheid. During this time, the South African education system demonstrated an interest in a specific type of knowledge which Koopman refers to as a science of government. This science of government leaves the learners with a blurred understanding of science that is disconnected from external nature and human nature and is presented as a series of abstract concepts and definitions. The book also investigates the dialectical tensions between the science curriculum and the role of the teacher as an active implementer of the curriculum. The book draws on the work of various phenomenological scholars, namely Edmund Husserl, Martin Heidegger, Merleau-Ponty, and Max van Manen, to discuss these tensions.

Resurgence and Revalorization of Indigenous Knowledge Systems in the Contemporary Society Masenya, Tlou, Maggie, Bhuda, Monicca Thulisile, 2025-05-08. Indigenous knowledge is the comprehensive body of knowledge that locals accumulate from life experience, unofficial research, and close observation of their surroundings within a particular culture. It connects the entirety of nature and the components that sustain life to the

survival of every human being. Additionally, it gives specific community conditions in respect to the environment and offers workable answers to people's problems. As a result, by preserving indigenous knowledge systems, indigenous knowledge may provide value to the community by offering innovative solutions to social, environmental, and economic issues. *Resurgence and Revalorization of Indigenous Knowledge Systems in the Contemporary Society* explores the role of indigenous knowledge in the contemporary society. Furthermore, it discusses the importance of preserving and sharing indigenous knowledge for community development. Covering topics such as epistemic diversity, traditional load, and indigenous curricula, this book is an excellent resource for sociologists, policymakers, government officials, environmentalists, educators, records managers, professionals, researchers, scholars, academicians, and more.

Social Justice and Transformative Learning Sandra M. Tomlinson-Clarke, Darren L. Clarke, 2016-03-10. The similarities between the United States and South Africa with respect to race, power, oppression, and economic inequities are striking, and a better understanding of these parallels can provide educational gains for students and educators in both countries. Through shared experiences and perspectives, this volume presents scholarly work from U.S. and South African scholars that advance educational practice in support of social justice and transformative learning. It provides a comprehensive framework for developing transformational learning experiences that facilitates leadership for social justice and a deeper understanding of the factors influencing personal, national, and global identity.

Global Developments in Literacy Research for Science Education Kok-Sing Tang, Kristina Danielsson, 2018-01-19. This book highlights recent developments in literacy research in science teaching and learning from countries such as Australia, Brazil, China, Finland, Germany, Hong Kong, New Zealand, Norway, Singapore, Spain, South Africa, Sweden, Taiwan, and the United States. It includes multiple topics and perspectives on the role of literacy in enhancing science teaching and learning, such as the struggles faced by students in science literacy learning, case studies, and evaluations of classroom-based interventions and the challenges encountered in the science classrooms. It offers a critical and comprehensive investigation on numerous emerging themes in the area of literacy and science education, including disciplinary literacy, scientific literacy, classroom discourse, multimodality, language, and representations of science and content, and language-integrated learning (CLIL). The diversity of views and research contexts in this volume presents a useful introductory handbook for academics, researchers, and graduate students working in this specialized niche area. With a wealth of instructional ideas and innovations, it is also highly relevant for teachers and teacher educators seeking to improve science teaching and learning through the use of literacy.

Resources in Education, 1994. *Self-Directed Learning* (Prof.) Elsa Mentz, Charlene du Toit-Brits, Jean Henry Blignaut, Elize Vos, 2024-12-20. This scholarly book provides an in-depth analysis of self-directed learning (SDL) within contexts of curriculum praxis and scholarship. The book presents original research from multiple authors, which provides diverse perspectives and methodologies for enhancing understanding of SDL. It primarily focuses on incorporating SDL into curriculum development and emphasises the significance of scholarly research in

designing effective curricula The book explores the integration of technology in learning and adapts instructional strategies to meet the evolving demands of higher education and school environments Inspired by constructivism socio constructivism and context based learning theories the text presents practical strategies for educators Key topics include the implications of artificial intelligence strategies for reducing procrastination fostering SDL in homeschooling enhancing SDL attributes preparing teachers for self direction facilitating curriculum transformation and incorporating indigenous knowledge The book also covers teaching climate change education and integrating educational robotics Self Directed Learning Curriculum implementation praxis and scholarship in context is invaluable for scholars and researchers in education providing empirical findings and practical insights to inspire further research It aims to equip learners with 21st century skills preparing them for the challenges of the Fourth Industrial Revolution
