Japan Viewed from Interdisciplinary Perspectives Yoneyuki Sugita, 2015-10-29 The growth rate of the Gross Domestic Product GDP in the Asia Pacific region greatly surpasses the world average When the Trans Pacific Partnership TPP is better realized then the world s largest free trade zone will be firmly established It seems that this region has a very rosy outlook indeed however this region also faces a large number of serious problems such as atomic energy in Japan conflicts about East Asian regional integration the decline of the Japanese Official Development Assistance ODA and the TPP s possible impact on the Japanese universal health insurance system We now face a possible Sino Japanese military conflict concerning the Senkaku Islands or Diaoyutai Islands In short the Asia Pacific region has both a rosy future and the potential influence from unstable and dangerous elements at work within the region at present The main purpose of this book is to analyze historical development whilst looking at the contemporary situation of Japan from interdisciplinary perspectives This book asks three major questions 1 Is this really globalization 2 What are Japan s relations with other Asian countries 3 Do U S Japan relations still matter Fourteen leading scholars in their fields answer these questions from interdisciplinary perspectives

California Earthquakes Carl-Henry Geschwind, 2003-04-30 Winner of the Book Prize of the Forum for the History of Science in America from the History of Science Society In 1906 after an earthquake wiped out much of San Francisco leading California officials and scientists described the disaster as a one time occurrence and assured the public that it had nothing to worry about California Earthquakes explains how over time this attitude changed and Californians came to accept earthquakes as a significant threat as well as to understand how science and technology could reduce this threat Carl Henry Geschwind tells the story of the small group of scientists and engineers who in tension with real estate speculators and other pro growth forces private and public developed the scientific and political infrastructure necessary to implement greater earthquake

awareness Through their political connections these reformers succeeded in building a state apparatus in which regulators could work together with scientists and engineers to reduce earthquake hazards Geschwind details the conflicts among scientists and engineers about how best to reduce these risks and he outlines the dramatic twentieth century advances in our understanding of earthquakes their causes and how we can try to prepare for them Tracing the history of seismology and the rise of the regulatory state and of environmental awareness California Earthquakes tells how earthquake hazard management came about why some groups assisted and others fought it and how scientists and engineers helped shape it
