[A History of Scientific Journals](#) Aileen Fyfe, Noah Moxham, Julie McDougall-Waters, Camilla Mørk Røstvik, 2022-10-03 Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of

journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history

Future Spacecraft Propulsion Systems and Integration Paul A. Czysz, Claudio Bruno, Bernd Chudoba, 2017-08-30 The updated and expanded third edition of this book focuses on the multi disciplinary coupling between flight vehicle hardware alternatives and enabling propulsion systems It discusses how to match near term and far term aerospace vehicles to missions and provides a comprehensive overview of the subject directly contributing to the next generation space infrastructure from space tourism to space exploration This holistic treatment defines a mission portfolio addressing near term to long term space transportation needs covering sub orbital orbital and escape flight profiles In this context a vehicle configuration classification is introduced covering alternatives starting from the dawn of space access A best practice parametric sizing approach is introduced to correctly design the flight vehicle for the mission This technique balances required mission with the available vehicle solution space and is an essential capability sought after by technology forecasters and strategic planners alike

Essays in the Philosophy of Chemistry Eric Scerri, Grant Fisher, 2016-04-10 The philosophy of chemistry has emerged in recent years as a new and autonomous field within the Anglo American philosophical tradition With the development of this new discipline Eric Scerri and Grant Fisher s

Essays in the Philosophy of Chemistry is a timely and definitive guide to all current thought in this field. This edited volume will serve to map out the distinctive features of the field and its connections to the philosophies of the natural sciences and general philosophy of science more broadly. It will be a reference for students and professional alike. Both the philosophy of chemistry and philosophies of scientific practice alike reflect the splitting of analytical and continental scholastic traditions and some philosophers are turning for inspiration from the familiar resources of analytical philosophy to influences from the continental tradition and pragmatism. While philosophy of chemistry is practiced very much within the familiar analytical tradition, it is also capable of trail blazing new philosophical approaches. In such a way the seemingly disparate disciplines such as the hard sciences and philosophy become much more linked.

Fractal Sustainability Isabel Canto de Loura, Robin Dickinson, 2016-08-12. Even though the fractal approach to sustainability and organizational change management is not new, no authors so far seem to have truly attempted to use fractals as a mathematical means to map and measure organizational sustainability. Several sustainability maturity models and change management models and frameworks, concepts and computer generated systems came to the fore during the past two decades. They provided a set of useful tools for managers, academics and students to refer to or on which to base their own actions and plans. However, one issue remains: most of those models and frameworks share a rather similar linear skeleton; the main difference between them is the quantitative variety of steps within each phase, stage and parameter, and how in depth each of these is presented. The authors' work addresses a clear gap in the literature and in applied research as it emphasizes the relevance of using a complex mathematically based but user friendly fractal approach. Readers are able to better understand, implement, map and measure change management processes, leading to a sustainability focused mindset. Subsequent chapters guide you through the steps towards creating committed sustainability based strategies, attitudes, actions and practices across all levels in the broad organizational context. This text is essential reading for students researching business and management and who are interested in the Fractal Sustainability concept.

A scholarly contribution to educational praxis M.A. Mokoena, J.M. (Ona) Janse van Rensburg, M. Erasmus, E. Mentz, C.B. Zulu, A. Cronje, E.K. Materechera, W.T. Dudu, A.T. Kanyimba, S.P. Raath, C. Kruger, A. Loubser, A.E. Pienaar, A. Kloppe, S. Ellis, N.T. Petersen, J. de Beer, J. Varughese, A. Seugnet, Blignaut, C. Els, 2016-12-31. This publication contains original research targeting scientific specialists in the field of education through research endeavours grounded on a philosophical basis as well as being embedded in the empirical. The research methodology of each chapter emanates from applicable philosophical assumptions in the form of an applicable theoretical and conceptual framework. The latter forms a firm basis for the application of sound empiricism. The content of this book adds to the body of scholarly knowledge in education. In his evaluation of the book, Acting Executive Dean, Faculty of Education and Training, Professor Akpovire Oduaran made the following remarks: "To a large extent, the ideas put together in this book have come from data generated not just from literature found in books and journals but actual interactions with educators and the learning

environment So then what the reader is offered in this volume is the articulation of ideas that have been interrogated structured and presented in surprisingly simplistic and yet incisive and academically enriching content that can match the standards of scholarship that is available in the Western World Yet what makes this book so welcome relevant and timely is the fact that it is built around Afrocentric theories and practices such as one may find in imported literature

Human Development and Global Institutions Richard Ponzio, Arunabha Ghosh, 2016-02-05 This book provides a timely and accessible introduction to the foundational ideas associated with the human development school of thought It examines its conceptual evolution during the post colonial era and discusses how various institutions of the UN system have tried to engage with this issue both in terms of intellectual and technical advance and operationally Showing that human development has had a profound impact on shaping the policy agenda and programming priorities of global institutions it argues that human development has helped to preserve the continued vitality of major multilateral development programs funds and agencies It also details how human development faces new risks and threats caused by political economic social and environmental forces which are highlighted in a series of engaging case studies on trade water energy the environment democracy human rights and peacebuilding The book also makes the case for why human development remains relevant in an increasingly globalized world while asking whether global institutions will be able to sustain political and moral support from their member states and powerful non state actors It argues that fresh new perspectives on human development are now urgently needed to fill critical gaps across borders and entire regions A positive forward looking agenda for the future of global governance would have to engage with new issues such as the Sustainable Development Goals energy transitions resource scarcity and expansion of democratic governance within and between nations Redefining the overall nature and specific characteristics of what constitutes human progress in an increasingly integrated and interdependent world this book serves as a primer for scholars and graduate students of international relations and development It is also relevant to scholars of economics political science history sociology and women s studies
