Aneshensel, 2012-12-11 This book presents the elaboration model for the multivariate analysis of observational quantitative data This model entails the systematic introduction of third variables to the analysis of a focal relationship between one independent and one dependent variable to ascertain whether an inference of causality is justified Two complementary strategies are used an exclusionary strategy that rules out alternative explanations such as spuriousness and redundancy with competing theories and an inclusive strategy that connects the focal relationship to a network of other relationships including the hypothesized causal mechanisms linking the focal independent variable to the focal dependent variable The primary emphasis is on the translation of theory into a logical analytic strategy and the interpretation of results The elaboration model is applied with case studies drawn from newly published research that serve as prototypes for aligning theory and the data analytic plan used to test it these studies are drawn from a wide range of substantive topics in the social sciences such as emotion management in the workplace subjective age identification during the transition to adulthood and the relationship between religious and paranormal beliefs The second application of the elaboration model is in the form of original data analysis presented in two Analysis Journals that are integrated throughout the text and implement the full elaboration model Using real data not contrived examples the text provides a step by step guide through the process of integrating theory with data analysis in order to arrive at meaningful answers to research questions      *Excellence Gaps in Education* Jonathan A. Plucker, Scott J. Peters, 2020-01-15 2017 Texas Association for Gifted and Talented Legacy Scholar Book Award 2017 National Association of Gifted Children Scholar Book of the Year Award In *Excellence Gaps in Education* Jonathan A Plucker and Scott J Peters shine a spotlight on excellence gaps the achievement gaps among subgroups of students performing at the highest levels of achievement Much of the focus of recent education reform has been on closing gaps in achievement between students from different racial ethnic or socioeconomic backgrounds by bringing all students up to minimum levels of proficiency Yet issues related to excellence gaps have been largely absent from discussions about how to improve our schools and communities Plucker and Peters argue that these significant gaps reflect the existence of a persistent talent underclass in the United States among African American Hispanic Native American and poor students resulting in an incalculable loss of potential among our fastest growing populations Drawing on the latest research and a wide range of national and international data the authors outline the scope of the problem and make the case that excellence gaps should be targeted for elimination They identify promising interventions for talent development already underway in schools and provide a detailed review of potential strategies including universal screening flexible grouping targeted programs and psychosocial interventions *Excellence Gaps in Education* has the potential for changing our national conversation about equity and excellence and bringing fresh attention to the needs of high potential students from

underrepresented backgrounds
